Re: Request for permissive change

Applicant: Waio Inc

FCC ID: PG2-TDA789ICJ (900MHz Transmitter)

To whom it may concern,

Request is hereby submitted by Waio Inc for a permissive change to filing referenced above to reflect a new lower frequency limit of 903.60MHz down from 905.45 MHz in the original filing. Due to a miscommunication, the EUT was originally lab tested at a lower limit of 905.45MHz. The product has a firmware adjusted lower frequency limit of 903.60MHz. The product was re-tested satisfactorily at the new lower operational frequency of 903.60MHz per the attached report.

If you have questions or need further information, please contact the undersigned.

Sincerely,

Timothy J. DePumpo
President, Waio Inc.
