RE: Channel Limitation on 2Wire RG3700HGV-00 and RG370HGV-00 Gateways

To whom it may concern:

We'd like to explain how we ensure that the 802.11 b/g device models RG3700HGV-00 and RG370HGV-00 comply with FCC 15.15b. Products sold within the US are only configured to operate on channels 1-11 as referenced in the application for certification. This is achieved by the US product having a specific PCA (PC Assembly Number) and firmware that restricts operation to channels 1-11. The end-user is not able to download software to enable channels 12 and 13.

A handwritten signature in black ink, appearing to read "J. Muir".
