To whom it may concern;

The transmission protocol used by the Welch Allyn 802.11 a/b/g wireless radio limits the maximum transmit duty cycle to 14% or lower. The Welch Allyn 802.11 a/b/g wireless radio continuously monitors the transmit duty cycle and if the transmit duty cycle exceeds 14% in any 30-second period, the transmitter is shut-down and a system error is reported.

Sincerely,

A handwritten signature in blue ink, appearing to read "R. Berry".

Robert W. Berry
Regulatory Affairs Manager
