## **FCC INFORMATION TO THE USER**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

## **WARNING**

Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

6. SPECIFICATION

## 1. PRODUCTS FEATURES

- 15inch Color TFT-LCD PANEL

Guarantee broad view point. The real screen size is 370mm x 230mm

- OSD function ( ON SCREEN DISPLAY )

Loading OSD for convenient operation

- The function of smart setting ( Auto Adjustment )

- Slim Design

TFT - LCD is able to reduce the space at 60 - 70 % than CRT Monitor.

- Environmentally Friendly

The power consumption can be reduced by using this TFT-LCD Monitor in combination of a computer that conforms to the VESA DPMS (Display Power Management Signaling) standard.

Desk space can be used effectively due to the 20Cm depth.

- Plug-and-Play Compatible

This TFT-LCD monitor conforms to the VESA (Video Electronics Standards Association) standard and DDC1/DDC2B.

A picture adjustment function makes it possible to adjust the image quality to match the input signal.

## 2. General Safety Precautions.

### - Installing and Operating Precautions

For your protection, please read these instructions completely.

1) Place monitor at over 5cm - 15cm distant from wall not to block the ventilation opening.

The internal heat build-up may cause fire hazard or electric shock.

2) When you plug out, hold the plug

If you hold the wire, it may make fire hazard.

3) Do not place the monitor on an unstable place.

The monitor may fall, causing serious injury to user and serious damage to the monitor.

4) Do not place the monitor near a radiator and heat register or where it is exposed to direct sunlight. It may cause dangerous voltage or fire hazard by melting the monitor.

5) Do not install the monitor humid place.

It may cause the electric shock.

6) Please separate cables from monitor when you move it.

7) When the monitor is left unattended and unused for a long time, Unplug it from outlet.

8) Do not attempt to service the monitor yourself since opening the cabinet may expose you to dangerous voltage or other hazards.

9) Never spill liquid of any kind on the monitor.

10) Inset the plug full into the outlet.

If you don't, it may cause fire hazard.

11) There is smoke and odor smell in operation.

Turn off and plug out the monitor. Please contact a service center immediately.

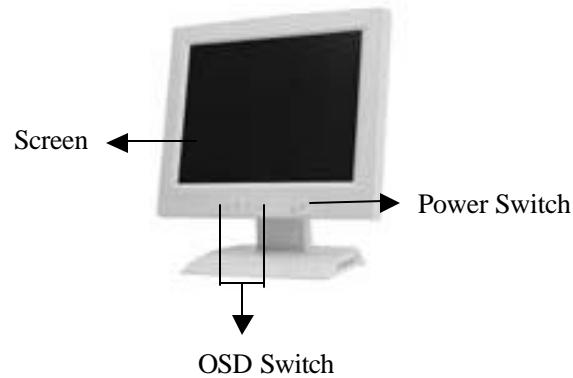

12) Do not use the sharp tool to avoid the scratch on the LCD panel.

This may be the cause of the defects.

We don't take responsibility for the damage which is caused by natural calamities.

### 3. Setting Up

#### - Packing List

15 inch TFT-LCD Monitor - 1 set

AC/DC adaptor - 1 set

AC power cables - 1 set

VGA cable - 1 set

User's Guide

USB Line - 1 set

Monitor

AC/DC Adaptor

A/C Power Cable

VGA Cable

Guide

USB Line

#### - Connecting with external equipment

Adjust VGA mode below 1024 X 768(XGA)

1. Turn off the computer and the monitor.
2. Place TFT-LCD Monitor on a stable place and connect power cable.
3. Connect VGA cable to VGA 15 Pin D-SUB Connector on the computer and screw the opposit cable after connecting it to VGA Input.
4. Turn off the monitor after completing to connect power cable and VGA to the computer. Then turn on the monitor.
5. Turn off the computer and the monitor after operating.

## 4.On-Screen Display Seetig

### 1. KEY FUNTION

#### [ + ] KEY :

When in scrolling mode, select the highlighted item.  
When in parameter-adjustment mode, increase the parameter value.

#### [ - ] KEY :

When in scrolling mode, select the highlighted item.  
When in parameter-adjustment mode, decrease the parameter value.

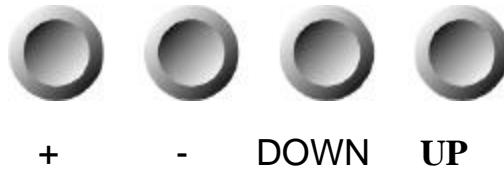

#### [ DOWN ] KEY :

Press Down button to activate the OSD which will display the main menu.  
When in scrolling mode, move the highlight down through the menu items.  
When in parameter-adjustment mode, escape to the scrolling mode.

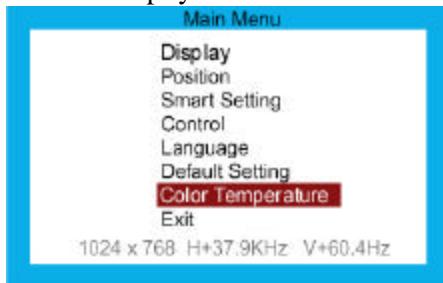

#### [ UP ] KEY:

Press Up button to activate the OSD which will display the main menu.  
When in scrolling mode, move the highlight up through the menu items.  
When in parameter-adjustment mode, escape to the scrolling mode.

#### [ + ]+[ - ] KEY : Auto Adjustment

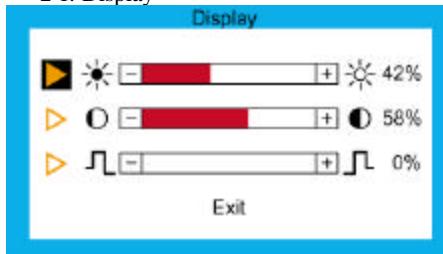

## 2. Menu Display

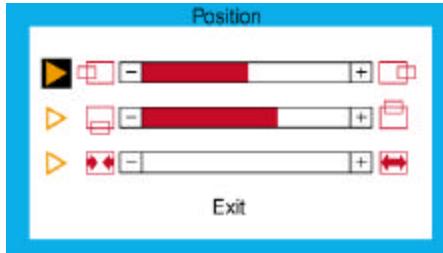

- 2-1. Display : Adjustment Brightness, Sharpness and contrast
- 2-2. Position : Adjustment of Position
- 2-3. Smart Setting : Auto adjustment
- 2-4. Control : Control of OSD
- 2-5. Language : Language of OSD Menu
- 2-6. Default Setting : Set values to defaults in Eeprom
- 2-7. Color Temperature : Set Color Temperature value (9300K, 5600K, User Setting)
- 2-8. Exit : Exit OSD Menu System

### 2-1. Display

- Adjust Brightness.
- Adjust Contrast.
- Adjust Phase.
- Exit : To Parent Menu.

### 2-2. Position

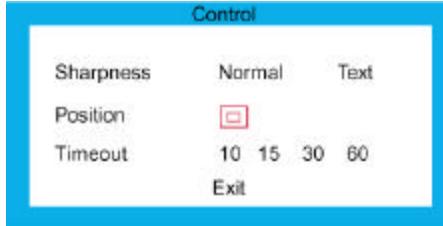

- Move Horizontal Position.
- Move Vertical Position.
- Adjust Horizontal Size.
- Exit : To Parent Menu.

### 2-3. Smart Setting

- Auto Adjustment.

### 2-4. Control

- Sharpness :
- Display Position Setting
- Auto Menu Off Time Setting.
- Exit : To Parent Menu.

## 2-5. Language

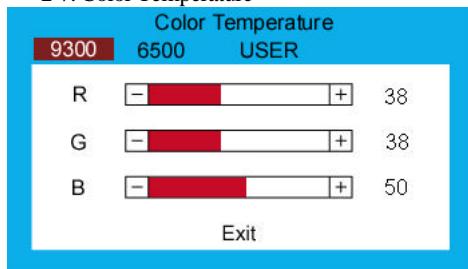

→ OSD text will be displayed in user selected

## 2-6. Default Setting

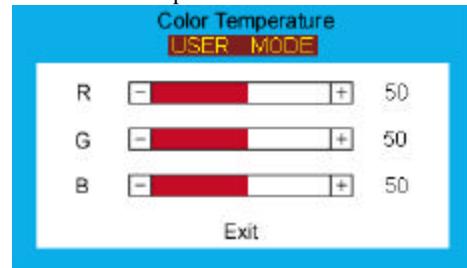

Set values to defaults in Eeprom

## 2-7. Color Temperature

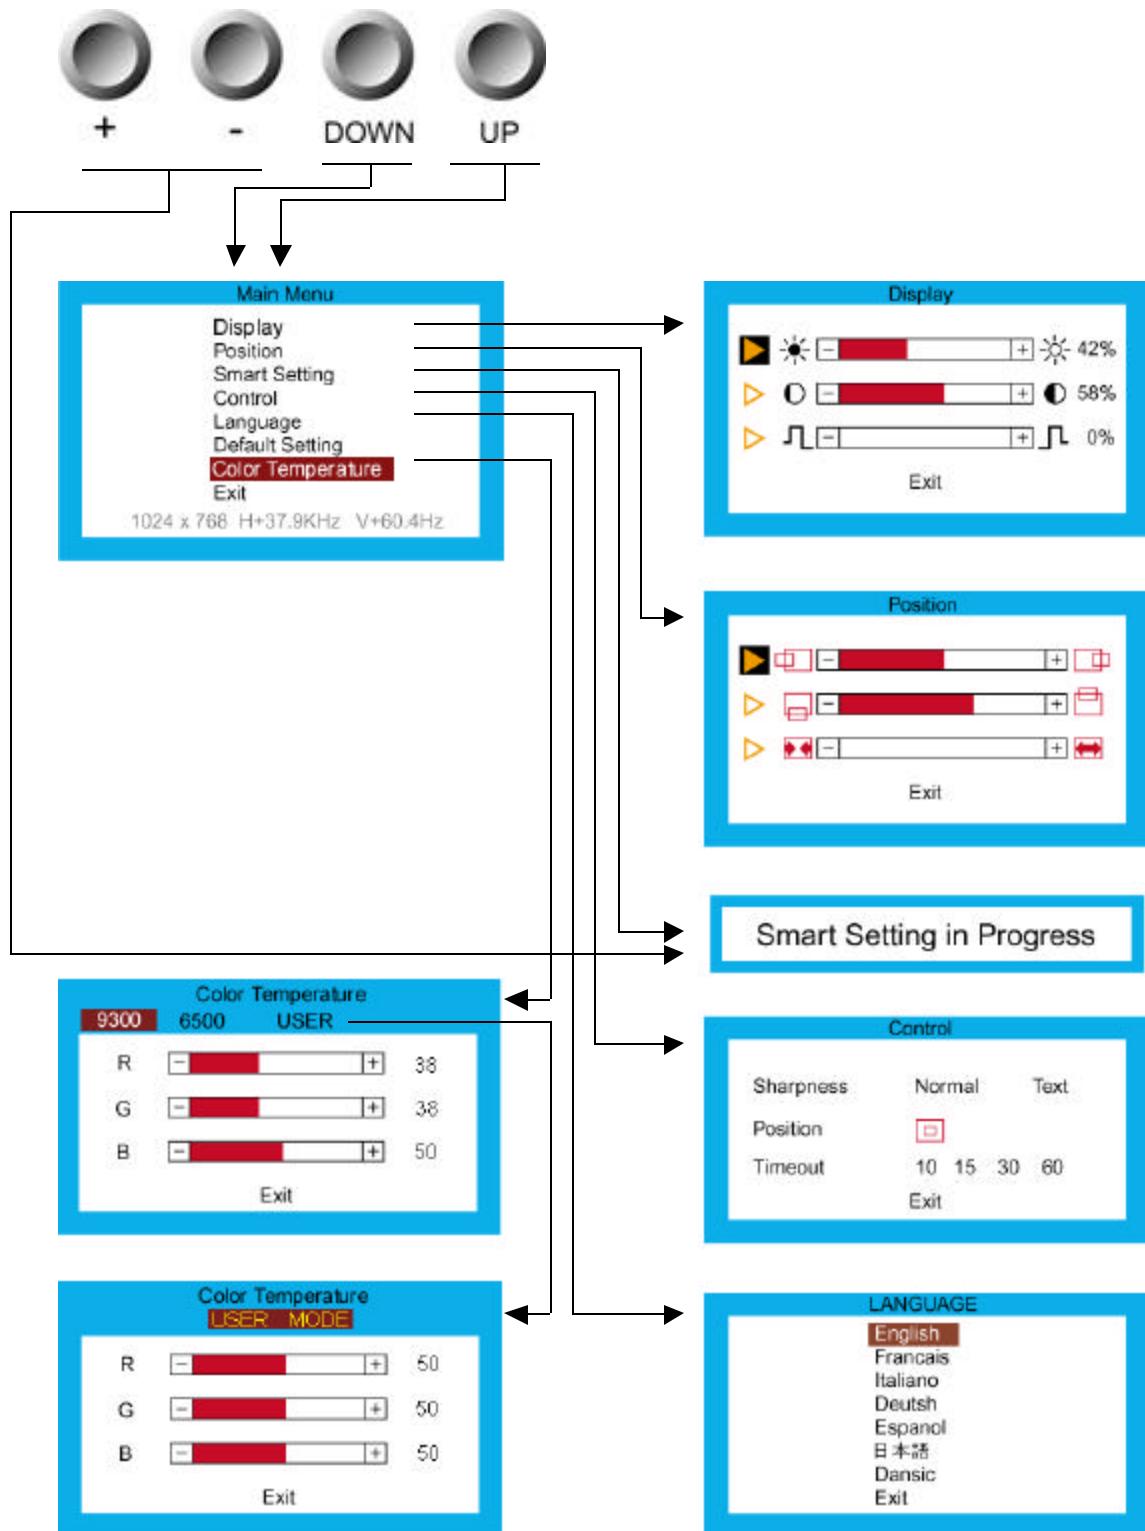

→ Color Temperature modes are composed of 9300, 6500 and user mode.

## 2-7-1. Color Temperature User Edit Mode

→ User can control the Color Temperature value at User Mode.

## 2-8. Exit

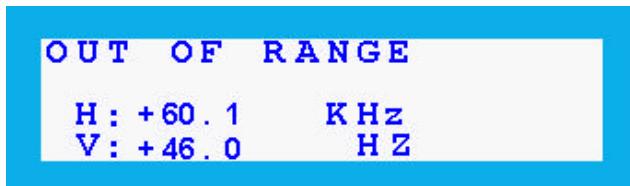

### 3. Miscellaneous Display

- This message showed when no sync Signal.

- This message is showed when Burn In Test mode.  
To using this mode  
(Remove the signal cable)
  1. Put on the power with pressed the (+) key.
  2. Burn in test in progressing automatically.
  3. To exiting the mode,  
put off the power and than  
put on the power with pressed  
(-) key

- This message is showed when incoming video signal is for a video mode not reliably supported i.e. a non-VESA-standard video mode.

## 5. Troubleshooting

1. The power is in off position and no image
  - 1) Check the power cable if it is completely connected to monitor.
  - 2) Check the power switch if it turn on.  
If the power switch is green, it mean operating.
2. No image and display Power Saving Off Mode  
If the power switch is flickering red or orange, check the computer if it is turn on and the cables connecting to Computer if it is completely connecting.
3. Lost the balance of the screen
  - 1) Adjust horizontality, verticality and horizontal size.
4. The text is unclear or display NOISE
  - 1) Adjust Phase
5. The screen is dark
  - 1) Adjust luminosity and contrast
6. No image and display out of range
  - 1) Check the video card mode if it is over XGA(1024 X 768)
  - 2) After booting the system by safety mode, setting the applicable mode.  
Turn on the monitor.

## 6. Specification

### 1. LCD

Type : 15 inch color TFT-LCD Panel

Pixel pitch : 0.3 X 0.3mm

Viewing angle : 55°( left / right ), 40°( up/ down )

color : 262,144 color

pixel format : 1024 x 768/75Hz

### 2. Input Signal

Horizontal frequency : 31-61 KHz

Vertical Frequency : 56-75Hz

Signal Type : H/Vsync

Input connector : 15P D-SUB

### 3. Power requirement(monitor)

Power : DC + 12V

Power Consumption : 17W(MAX)

### 4. Display size

Horizon X Vertical : 307 X 230mm

### 5. Appearance

Dimension : 378 X 390 X 161mm ( Width X height X length )

Box : 410 X 420 X 200mm ( Width X height X length )

Weight : 5.5kg ( expect for Monitor Box )

Supporter angle : left/right(340°) up/down(45°)

### 6. Resolution

VGA : 640 x 350 70Hz

640 x 400 70Hz

640 x 480 60,70,75Hz

SVGA : 800 x 600 56,60,70,72,75Hz

XGA : 1024 x 768 60,70,72,75Hz

### 7. Operating condition

Temperature : 10 35

Humidity : 10 80%

### 8. Keeping Condition

Temperature : -20 60

Humidity : 5 95%

### 9. AC/DC ADAPTOR

Input : AC100 ~ 240V 50/60Hz, 1.5A

Output : DC12V 3.33A 40W(MAX)

### 10. USB HUB

1 UP / 4 DOWN STREAM

The above specification is able to be changed without notice
