To whom it may concern:

We, the undersigned, hereby authorize PCTEST Engineering Laboratory Inc., to act on our behalf in all matters relating to applications for equipment authorization, including the signing of all documents relating to these matters. Any and all acts carried out by PCTEST Engineering Laboratory, Inc. on our behalf shall have the same effect as acts of our own.

We also hereby certify that no party to this application is subject to a denial of benefits, including FCC benefits, pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S. C. 862.

Sincerely,

Edward Nicholson

In re: SeMax Wireless, Inc.

FCC ID: PJ2CDM820

FCC Part 22/24 Certification

Request for Confidentiality

Gentlemen:

In accordance with 0.459 of CFR 47, SeMax Wireless, Inc., hereby requests confidentiality of the Operational description, Technical specification, Block Diagram, Circuit Diagrams, Circuit Descriptions, Parts List, Tune-up & Alignment Procedures, and Functions description of all active devices as submitted attachments for the subject application.

These documents contain detailed system and equipment description and related information about the product which SeMax Wireless, Inc. considers to be proprietary, confidential, and a custom design and, otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, SeMax Wireless, Inc. considers that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give competitors an unfair advantage in the market.

Sincerely,

Edward Nicholson
Director of Engineering
SeMax Wireless, Inc.

AFFIDAVIT FOR ESN PROTECTION OF CELLULAR DATA MODEMS

3-20-01

We hereby certify that the Wireless Modem, CDM-810, (FCC ID:) PJ2CDM820
is so designed that it complies with all the requirements for ESN protection specified in Section 22.919
of the FCC Rules.

- a) The transmitter in service has a unique ESN.
- b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular Data modem equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the modem transmitter inoperative.

Sincerely,

“Edward Nicholson

SUBJECT: SeMax Wireless, Inc.
FCC ID: PJ2CDM820
FCC E911 Requirements Per §22.921

Gentlemen:

SeMax Wireless, Inc., hereby certifies that the analog cellular data modem, (FCC ID:), PJ2CDM820 using the Automatic A/B Roaming – Intelligent Retry method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a “9-1-1” call is made and, at such time, will override any programming in the data modem unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Ed Nicholson", is written over a horizontal line.

Edward Nicholson
