Product Equality Declaration

ID ISC.MRU102

The UHF Reader device ID ISC.MRU102 is available in the Versions: ID ISC.MRMU102-A, ID ISC.MRU102-PoE and ID ISC.MRU102-USB. All devices of the reader ID ISC.MRU102 are nearly identical devices, which based on the same electronic printed boards with manly the same parts.

All Readers has the same RF device, integrated antenna and antenna connector. The main differences are the serial interfaces. The version ID ISC.MRMU102-A has a RS232 and USB interface, the version ID ISC.MRU102-PoE a LAN interface with Power over Ethernet and the version ID ISC.MRU102-USB a USB interface, only.

The module version has a four way multiplexer for an internal and three external antennas. The variant USB and PoE have a slimmed-multiplexer for only two antennas (1 internal + 1 external antenna).

The version ID ISC.MRMU102-A is a module version without housing, and the readers ID ISC.MRU102-PoE and ID ISC.MRU102-USB are mounted in a plastic housing.
