

## **Internal Photos**

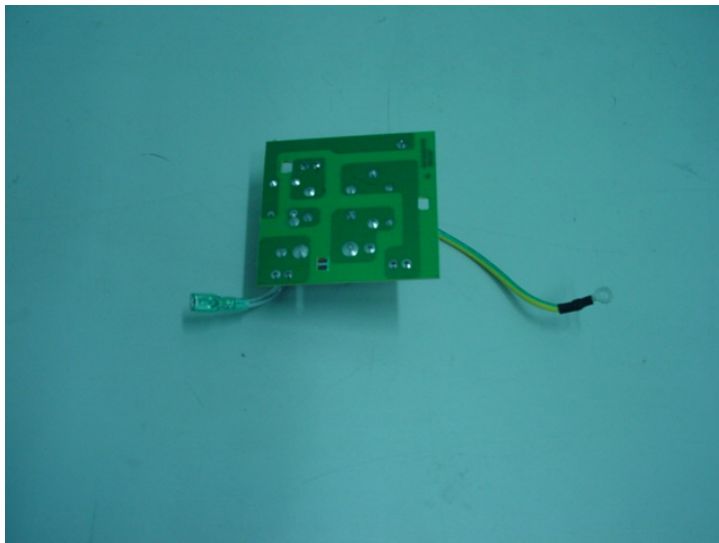

A detailed photograph of the interior of a microwave oven with its door open. The central component is a silver LG magnetron with technical specifications printed on it. To its right is a power transformer mounted on a copper heat sink. Various colored wires (blue, white, yellow, green, red) are connected to different parts of the unit. On the left, the door's interlock mechanism is visible. The entire unit is housed in a white plastic casing, and the background is a blue surface.

A photograph of a square metal transformer with a label that reads "ENCLOSURE RAMPAGE". The label also contains technical specifications: "Po: 4W", "Type: 220V/50Hz", "Date: 1998-03-10", and "Ser. No: 1100725000". The transformer is mounted on a grey surface.
