Dear Sir/Madam:

Novatel Wireless declares the following:

1. HP Drivers loaded onto the module will verify both HP VID/PID and also SMBUS read from system BIOS to confirm it is correct HP model. Install operation will only continue if the PID/VID and SMBUS information is confirmed.

2. Verizon Access Manager (VZAM) is the program that runs the connection software on the HP laptops. The connection manager has been developed specifically for the HP version of the E362. The access manager will only work with the E362.

Sincerely,

Todd Gallagher
