

OPERATING MANUAL

1. Tips

1.1 Energy-saving shutdown For instance when transporting, if you press the mouse button for longer than 2 minutes, the mouse switches off automatically. To reactivate the mouse, press the OFF switch and then the ON switch again.

1.2 Cleaning the devices

- 1) Switch the devices off (switch to OFF).
- 2) Clean the devices with a slightly damp cloth and some mild cleaning agent.
- 3) Dry off the devices with a soft, lint-free cloth.

1.3 Troubleshooting

- 1) Switch the mouse off and on again (see 1.1 "Energy-saving shutdown").
- 2) Check whether the batteries are inserted correctly and have sufficient voltage.
- 3) Connect the receiver to another USB port on the PC
- 4) Establish a new connection to the receiver:
 - a) Disconnect the receiver from the USB port and plug it in again.
 - b) Within 30 seconds, keep the mouse as near to the receiver as possible then press the scroll wheel and the right mouse button at the same time.
 - c) Release the buttons when the battery status LED on the mouse flashes after approx. 3 seconds.
 - d) Within 30 seconds, keep the keyboard as near to the receiver as possible, then press the esc and Q keys at the same time.
 - e) Release the keys when the battery status LED on the keyboard flashes after approx. 3 seconds.

2. Disposal

2.1 Disposing of the old units

Dispose of the old units via a collecting point for electronic scrap or via your dealer.

2.2 Disposing of the batteries

This device contains alkaline batteries. Do not dispose of them in the household waste. Batteries may contain pollutants which can harm the environment and in a retail outlet or at your local recycling depot. Returning the device is compulsory and free of charge. All batteries are recycled. This enables valuable resources to be restored such as iron, zinc or nickel. Recycling batteries is the easiest contribution you can make towards environmental protection.

3 Technical data

Supply voltage Keyboard/mouse: 3 V SELV, Receiver: 5.0 V/DC $\pm 5\%$ SELV

Keyboard: max. 4 mA, Mouse: max. 15 mA, Receiver: max. 35 mA

Storage temperature $-15\text{ }^{\circ}\text{C} \dots +60\text{ }^{\circ}\text{C}$, Operating temperature $0\text{ }^{\circ}\text{C} \dots +40\text{ }^{\circ}\text{C}$

4. Federal Communications Commission (FCC) Radio Frequency Interference Statement

Information to the user: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorientate or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
