To whom it may concern:

We, the undersigned, hereby authorize PCTEST to act on our behalf in all matters relating to applications for equipment authorization, including the signing of all documents relating to these matters. Any and all acts carried out by PCTEST on our behalf shall have the same effect as acts of our own.

We also hereby certify that no party to this application is subject to a denial of benefits, including FCC benefits, pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S. C. 862.

Sincerely,

A handwritten signature in black ink, appearing to read "Yehuda Mark".

In re: Cell Data Ltd
FCC ID: PNN-CELL5000-3
Confidentiality Request

Gentlemen:

In accordance with 0.459 of CFR 47, Cell Data Ltd hereby requests confidentiality of the Block Diagrams, Circuit Diagrams, Circuit Description, Parts List, Tune-up Procedure, Operational Description attachments for the subject application.

These documents contain detailed system and equipment description and related information about the product which Cell Data Ltd considers to be proprietary, confidential, and a custom design and, otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, Cell Data Ltd considers that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give competitors an unfair advantage in the market.

Sincerely,

A handwritten signature in black ink, appearing to read "Yehuda Mark".

**AFFIDAVIT FOR ESN PROTECTION
OF CELLULAR MOBILE TELEPHONES**

We hereby certify that the Cellular Modem FCC ID: PNN-CELL5000-3 is so designed that it complies with all the requirements for ESN protection specified in Section 22.919 of the FCC Rules.

- a) The transmitter in service has a unique ESN.
- b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely,

A handwritten signature in black ink, appearing to read "Yehuda Mark".
