Ref.: Attestation Letter

To whom it may concern,

Test report number 14U17191-1, issued March 21, 2014 demonstrating compliance for a BLE Module is being carried over for demonstration of compliance for this FCC ID as the module and its antenna are unchanged as incorporated within this EID device. The results contained in the report are representative of the performance of this device in respect of BLE radio/EMC requirements. Additional BLE spurious emissions and band edge testing has been carried out for BLE in addition to full RFID 0.128 MHz testing and supplied in the TUV SUD America test reports which are filed under this new FCC ID.

Sincerely,

Barbara Masin
Vice President
