Betreff: OIS-L FCC-Certification

Dear Mr. Meier, dear Mr. Bentje,

We ensure, that the OIS-L system consisting of the following parts: „77LA04/2-SER , 77LS03 and 76LD050“ can be classified as equipment for „professional use“.

The reasons for that are as follow:

1. **Application:** the OIS-L system in USA is used in a automated pallet storage. Under www.savoyelogistics.com you will find more information about this.
2. **Installation:** controller 77LA04/2-SER and antenna 77LS03 are mounted on transport vehicles for pallets and data tags are mouted on the pallets. This is done by our customer savoye logistics. In any case the installation has to be done by a technician with knowledge about the OIS-L system.
3. **Marketing:** our products are advertised in a few specific trade publications (RFID and automatisaton). In general sales activity is done by our staff in Weinheim, Germany. For USA trade is done by our sales representative Baumer Electric in France.

Mit freundlichen Grüßen

Baumer Ident GmbH

Hans-Günter Meuthen
