Subject: Certification Application
FCC ID: PNY-ODU4028G

9 September 2002

It is requested that the following information is to be held confidential on behalf of Radiant Networks Plc.

FCC Rules Part 0.459 refers.

Exhibit 8, Schematics: 11 files comprising a total of 65 pages.

Exhibit 8, BOMs (parts lists): 12 files comprising a total of 36 pages.

Exhibit 8, fabrication of boards, showing all layers: 11 files comprising a total of 105 pages.

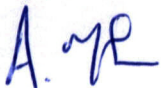

The board schematic and fabrication files reveal many novel features of the product, and are the subject of various patents not yet granted. Disclosure at this time would jeopardise this process and harm our commercial lead in developing the novel mesh concept for broadband wireless local access networks.

Given the close relationship between BOMs and schematics, it is requested that the BOMs are also held confidential.

None of the information in these exhibits is available to the public. Information has been disclosed to third parties - typically manufacturers and test houses - under individual non-disclosure agreements.

Taking account of the rapid changes in this technology, Radiant Networks requests that this information be kept confidential for five years or when patents have been granted, whichever is earlier. This period aligns with our non-disclosure agreements.

Yours sincerely

Anthony Martin
Chief Technical Officer
