

Declaration of Compliance to RF Exposure Limits for Humans

The XATA Application Module complies with the RF exposure limits for humans as called out in 2.1091 (mobile >20 cm) or 2.1093 (portable <20 cm). The XATA Application Module is used in a Truck Fleet Management System for vehicle tracking, driver management, and routing, and would be mounted on a vehicle. It is exempt from RF Evaluation based on its operating frequency of 2412-2462 MHz, and output power of 26 milliwatts; antenna gain is 0 dBi. This would be less than the 1.5 watt requirement for a mobile device operating at 2.4 GHz.

A handwritten signature in black ink that reads "Joel T. Schneider".
