Subject: **Letter of Attestation** for TIMCO-TCB/Request for additional info - Arcom Digital, LLC -  
FCC ID: POF209101QSN - JOB #: 2426UC12 Item #2: This device has a USB port. A USB connection  
requires address info to enable power to the device. As a result, this device is considered a peripheral  
device that connects to a Class B personal computer. Please submit a 731 Form and appropriate exhibits  
for the JBP portion of this device at your earliest convenience.

I hereby attest that:

1. The QSNARE-60 USB connection does not require "address info to enable power to the device" and therefore cannot be considered a peripheral device that connects to a Class B personal computer.
2. The QSNARE-60 is exempt from Part 15 B because the following sections of 15.103 are valid:
  - (a) A digital device utilized exclusively in any transportation vehicle including motor vehicles and aircraft.
  - (c) A digital device used exclusively as industrial, commercial, or medical test equipment.

As a result a 731 Form and appropriate exhibits for the JBP portion of this device is not required.

I declare that the above statements are true and accurate to the best of my knowledge.

Sincerely,

David P. Deyo

Manager
