RE: FCC ID: PPIRH-50_ATCB001466
Attention: Thomas Reitmayer

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the PC2 description states that the keypad was changed. Please explain if any of the electrical or electronic functions of the keypad (i.e. circuitry, etc) were changed. If electrical or electronic circuitry was changed, please explain why radiated emissions were not performed.
 2. Please note that as the external photo and internal photos cannot be confidential and as the front cover and keypad would be shown in these photos, please explain why the letter describing the purpose of the PC2 should be confidential.
 3. Please provide internal photos of the new keypad assembly.
- Industry Canada
4. Please note that a permissive change for Industry Canada is listed under the Reassessment category on the RSP100. Please note that you have incorrectly listed this as an addition to an existing family. Please correct the RSP100 to show the proper designation for this application.
 5. Please note that the Report Cover Sheet states that testing was done to RSS 128, however, the RSP100 states that testing was done to RSS 132. Please explain and please report the correct test standard and issue.
 6. Please provide a statement of compliance letter to RSS102.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
