Notes: -

4.1 EUT description

The EUT is a triple band (GSM850/1800/1900 EGPRS) mobile phone.

The EUT was not modified during the tests.

5 EUT TEST SETUPS

For each test the EUT was exercised to find out the worst case of operation modes and device configuration.

6 APPLICABLE STANDARDS

The tests were performed in guidance of CFR 47 part 22, part 2, ANSI/TIA/EIA-603-A and RSS-132. Deviations, modifications or clarifications (if any) to above mentioned documents are written in each section under "Test method" for each test case.

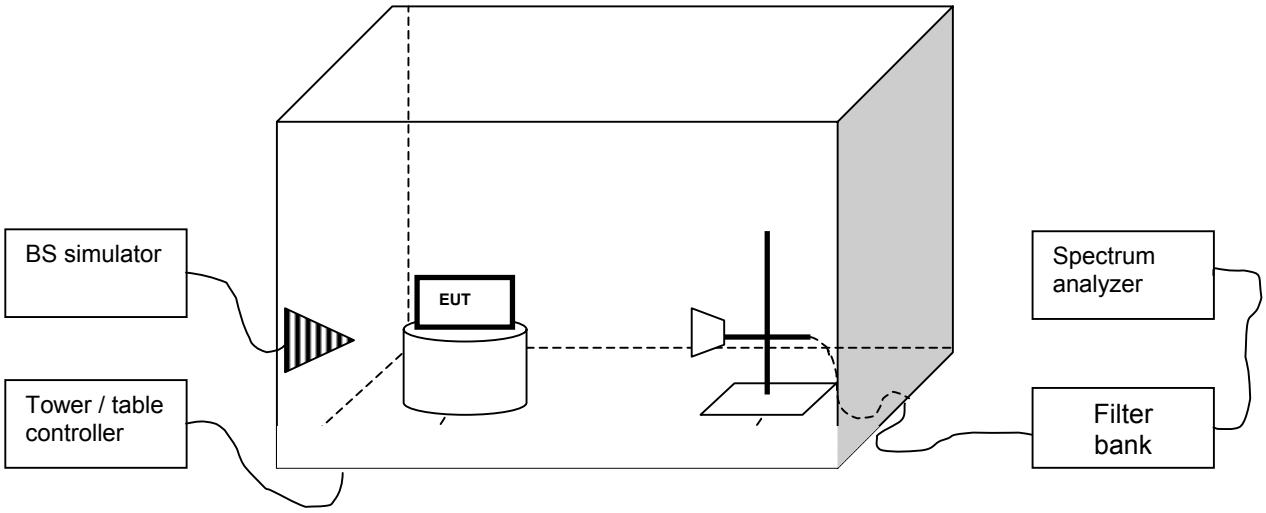
9.1 Test setup

A set of LP/HP/BS filters was used to prevent overloading the spectrum analyzer. The BS simulator was used to set the TX channel and power level and modulate the TX signal with different bit patterns. The test was done using an automated test system, where the measurement devices were controlled by a computer.



9.2 Test method

a) The emissions were searched and maximized by moving the turn table and measuring antenna and manipulating the EUT.

b) All suspicious frequencies with emission levels were recorded.

c) The EUT was replaced with a substituting antenna.

d) For each frequency recorded, the substituting antenna was fed with the power (from signal generator) giving the same reading as in (b). These power levels were reported.

9.4 Limit

Frequency [MHz]	Level [dBm]
30 – 8500	-13

9.5 Results

The formula below was used to calculate the EIRP of the spurious emissions. If there were no emissions closer than 20dB below the limit line, then the emission levels were measured at the transmitter's harmonics.

$$P_{Emission[dBm]} = P_{SubstTX[dBm]} - L_{Cable[dB]} + G_{Antenna[dBd]}$$

where the variables are as follows:

$P_{Measured\ [dBm]}$	Measured emission level (from step b in 9.2)
$P_{Subst\_TX\ [dBm]}$	Signal generator power (from step d in 9.2) fed to the substituting antenna
$L_{Cable\ [dB]}$	Loss of the cable between antenna and signal generator (from step d in 9.2)
$G_{Antenna\ [dBd]}$	Gain of the substitutive antenna over dipole (dBi – 2.15dB)

Table 3 Emission levels, channel 190, GSM
