FCC Application Processing Branch
Re: FCC ID PQCM2601A-95
Applicant: Philips Medical Systems North America Co.
Correspondence Reference Number: 23177
731 Confirmation Number: EA263790

1. Please submit clear schematic diagrams. The current schematics are unreadable.
2. Please submit external EUT photographs.

Response:

June 26, 2002

Hello Steve,

Thank you for your e-mail. We were able to send the schematics out for .pdf format. I believe that the new files should be more readable. Please let me know if you encounter difficulties again.

The external EUT pictures are also added today as attachments. We do not have EUT photos with the new labeling which will be on the back side (rear) of the M2601A transmitter, only a proposed drawing, because we are awaiting FCC approval of the content. It is expected that these new labels will be silk-screened onto the plastic housing.

Thank you for your assistance while we pursue a Part 95 Grant. Please feel free to contact either me or David Jones should you have any questions or require additional information.

Sincerely,

Denise Haley Q&R Engineer, or
