Regulatory Notices

This document provides notice, and specific notice, of the regulatory requirements and conditions of use for the product. Some of these notices may apply to your product. The information in this document is for informational purposes only. It is not intended to be a substitute for the regulatory requirements of the country in which you are using the product. For more information, please contact your local regulatory authority.

Federal Communications Commission notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, it may cause interference to radio communications. However, it is guaranteed that interference will occur in a particular installation.

If this equipment does cause harmful interference to you or others, you are encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and other equipment.
- Connect the equipment to a different outlet or a different branch circuit.
- Consult the dealer or a qualified technician for assistance.

For additional information, see Part 15 of the FCC Rules. Questions to file the following notices:

- The device may not cause harmful interference, and the device may not be used in certain areas.
- For questions regarding this document, write to: HP, Inc., 15000 HP Road, Houston, TX 77058, USA.

To identify your product, refer to the part, series, or model number located on the product.

Modifications

The FCC requires the user to be notified that any changes or modifications made to the product that are not expressly approved by the FCC may void the user's authority to operate the equipment.

Cables

When you comply with the FCC and Regulations, you must use the cables that are used to connect the device to the network. The use of other cables may void the user's authority to operate the equipment.
