

# Bluetooth Receiver

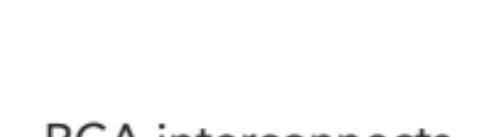

Designed by Joey Roth, 2013

The box in front of you should contain:

*a*  
*Bluetooth receiver*

*b*  
*Power supply*

*c*  
*Cables*

-RCA interconnects  
-Power cord

---

If any of these parts are missing or appear damaged, please email [service@joeyroth.com](mailto:service@joeyroth.com) before proceeding.

---

## Setup:

1. Connect the Bluetooth receiver's LINE OUT to the speaker amp's or subwoofer's LINE IN
2. Connect one end of the power cord to the DC 5V jack on the Bluetooth receiver, and the other end to a wall outlet or powered USB port.
3. Switch on the Bluetooth receiver and wait for the front LED to start blinking blue and red
4. Enable Bluetooth on your device of choice and link it to the Bluetooth receiver, which will be called CERAMIC SPEAKER SYSTEM on the list of available devices.
5. Make sure the speaker and subwoofer amps are both turned on, and begin playing music wirelessly

If you have any questions about setting up or using your Bluetooth receiver, please contact us at

## **FCC Warning:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment

and receiver.

-- Connect the equipment into an outlet on a circuit different

from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.
