In re: Philips Innovative Applications request for certification of a modification to
FCC ID:PT5TSU9600

Gentlemen:

Philips is submitting this request to comply with the requirements to certify a spread spectrum transmitter that is intended to be marketed for use in the US. This device operates under the provisions of Part 15.247.

Philips certifies the changed device continues to meet the requirements for certification in the US. The submitted test report shows the device complies with the requirements of 15.247. Changes to the device are to the housing as documented in the photos. In an abundance of caution, Philips is requesting this be considered as a Class II permissive change.

Please direct all correspondence including the certificates to me at the address below.

Sincerely yours,

(signed)
Phillip Inglis
Agent for Philips Innovative Applications
