Statement

The LogiRead LF one channel reader LT-LFS01-LM (FCC ID: **PTD-EA-1121660**) is an RFID integrator modified for Lumenis applications. The purpose of this module is mainly, but not limited to, the management of consumables attached to Lumenis systems. It has no use for the general public for any other application, and cannot be used as such, as it contains authentication keys known only to Lumenis.

The RFID FCC ID: **PTD-EA-1121660** module installation must be carried out by trained and authorized personnel. The module is intended to be employed within Lumenis' machines. Hence such an installation requires opening the laser console, which may be done by licensed professionals to begin with. Furthermore, the matching between the module and the system may vary from one machine to another and may require dedicated tools.

The RFID module shall not be sold to the general public whatsoever. It must be sold to authorized distributors or service personnel as a spare part. Each sale and each installation is controlled and documented. After installation, the installer must verify the validity of installation, which may require specific knowledge, such as a service password to the machine or some service accessory, which is not a saleable item, but distributed to licensed professionals only.

Sincerely,

Eyal Benisty

R&D, Electronics Manager

Lumenis LTD.
