

RF Exposure Report FCC

According to §15.247(e)(i) and §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines. No SAR required if power is lower than the following threshold: Frequency Range

Mode	Tested output power(dBm)	Antenna gain(dBi)	EIRP (dBm)/mW	SAR Limitation(mW)
802.11b	10.23	0.21	10.44/11.06	24.58
802.11g	11.99	0.21	12.20/16.59	24.58
EIRP= Tested output power+ Antenna gain				

Maximum measured transmitter power: 16.59mW

Conclusion: No SAR is required.
