

Installing the Slim Low-Profile Antenna

U.S. Patent No. 6,317,089

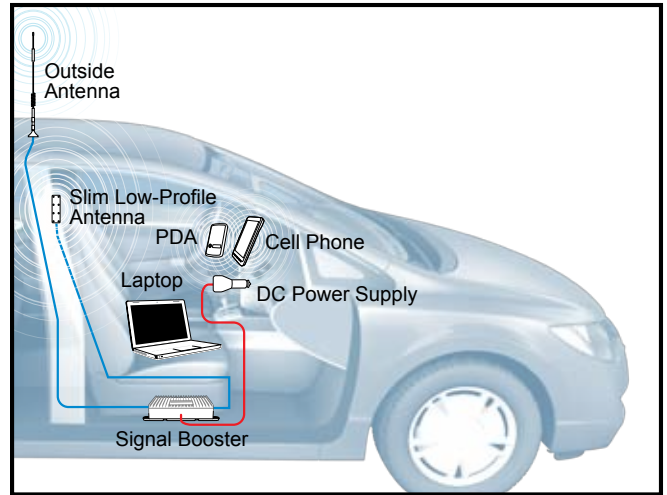

- 1) Place the Slim Low-Profile Antenna on the side of the driver's seat for maximum performance.
- 2) Install the Slim Low-Profile Antenna at least 18 inches from where the cell phone or cellular data card will be used.
- 3) Install the Slim Low-Profile Antenna at the same angle as the cell phone when held in use, or place next to the laptop's cellular data card. This will maximize the signal strength.
- 4) The Slim Low-Profile Antenna must have a separation of at least six inches from any metal object.
