1) Concerning the 20.21(f)(1)(4)(i) statement and label text requirement, FCC requests that the same words and the same uppercase and lowercase lettering scheme as shown in the rules shall be used for the label; please provide updated exhibit.

[Wilson - According to Title 47 Part 2.925\(f\): Where it is shown that a permanently affixed nameplate is not desirable or is not feasible, an alternative method of positively identifying the equipment may be used if approved by the Commission. The proposed alternative method of identification and the justification for its use must be included with the application for equipment authorization.](#)

[The device is too small for the requested label to fit on the device, rendering a permanently affixed label infeasible. The proposed alternative and justification was included with the application as seen on three exhibits: Cover Letter\\_Alternative Warning Label Placement, Label & Location, and External Photos. Attached are copies of those exhibits. Alternatively I have included a file with images of the PWO460006 with the required label. It is obvious from these images that the label does not fit.](#)

2) Per 20.21(f)(1)(2), the 20.21(f)(1)(4)(i) statement must also be in the users' manual; please provide updated exhibit.

[Wilson - The updated user manual exhibit is also attached with the required information.](#)
