# Legal notices

The mobile phone described in this guide is approved for use on the GSM and GPRS networks operating on the GSM 900, 1800 (DCS/PCN) and 1900 (PCS) bands. It is approved for use in the country where it was originally sold and may be approved for use in other countries.

right page (3) of C72 Cormorant FUG, 105x143, us-en, A31008-H6090-A40-1-4A19 (30.09.2005,

© 2005 Siemens Information and Communication Mobile, LLC. All rights reserved.

Siemens and the C72 model phone are trademarks or registered trademarks of Siemens AG and/or its affiliates in the United States and/or other countries.

T9® is a registered trademark of America Online, Inc. in the United States, Java and all Java-based trademarks and logos are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S and other countries. The names of actual companies and products mentioned herein may be the trademarks of their respective owners.

#### Disclaimer

THE INFORMATION CONTAINED IN THE USER GUIDE IS WRITTEN FOR THE C72 PHONE, SIEMENS RESERVES THE RIGHT TO MAKE CHANGES AND IMPROVEMENTS TO THE PRODUCTS AND ANY OF THE FEATURES OF THE PRODUCTS DESCRIBED IN THIS DOC-UMENT WITHOUT PRIOR NOTICE. THE CONTENTS OF THE USER GUIDE ARE PROVIDED "AS IS". EXCEPT AS REQUIRED BY APPLICABLE LAW, NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING,

BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE MADE IN RELATION TO THE ACCURACY, RELIABILITY OR CONTENTS OF THIS DOCUMENT. SIEMENS RESERVES THE RIGHT TO REVISE THE USER GUIDE OR WITH-DRAW IT AT ANY TIME WITHOUT PRIOR NOTICE. UNDER NO CIRCUM-STANCES SHALL SIEMENS BE RESPONSIBLE FOR ANY LOSS OF DATA OR INCOME OR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES HOWSOEVER CAUSED.

#### **Export Information**

The mobile phone may be subject to export regulation of the United States and other countries, Diversion contrary to law is prohibited. You must comply with all applicable export laws, restrictions and regulations of the United States foreign agencies or authorities, and may not export, or transfer for the purpose of re-export, the mobile phone or any part of the phone in violation of any

(U)

#### Legal notices

applicable restrictions, laws or regulations, or without all necessary approvals.

#### **Network Services**

A number of features included in this guide are called Network Services. They are special services provided by wireless service providers. In order to use any of these Network Services, you must subscribe to these service(s) from your service provider and obtain instructions for their use. Some of these Network Services may not be available when roaming on a network other than your home network.

# Standby and Talk Time Information

The mobile phone incorporates features that are new to the mobile phone world. These may include color displays and lighting, graphic games, music reproduction and browsing the Internet. The way you use the display and the features will affect the performance of the battery and how long it lasts between charge cycles. The quoted standby times and talk times show the minimum and maximum performance that can be expected from the battery under normal network conditions and with the default settings as set by the factory. However, playing games (particularly with the backlight continuously switched on) and listening to music will shorten the

time available for standby and to make and receive telephone calls. Operation times also vary depending on network conditions, SIM settings, charging and battery condition, how you use your phone and other factors.

#### Memory

The mobile phone contains an internal memory device that stores the software required to operate the mobile phone, communicate with the GSM/GPRS network and provide the user interface. Some features in the internal memory run additional devices and some additional games and utilities. The amount of memory available in the mobile phone is finite and may be insufficient to store large numbers of applications and files.

#### Warning!

Remember to back up your data and to do so frequently. Always back up all data and programs before sending the mobile phone in for repair.

(U)

# Safety precautions

#### Information for parents

Please read the operating instructions and safety precautions carefully before use.

Explain the content and the hazards associated with using the phone to your children.

right page (5) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

Remember to comply with legal requirements and local restrictions when using the phone. For example in aeroplanes, petrol stations, hospitals or while driving.

Cellular phones can interfere with the functioning of medical devices such as hearing aids or pacemakers. Keep at least 9 inches (20 cm) between phone and pacemaker. When using the cell phone hold it to the ear which is farthest from the pacemaker. For more information consult your doctor.

The ringtone (page 88), info tones (page 92) and speakerphone talking are reproduced through the loudspeaker. Do not hold the phone to your ear when it rings or when you have switched on the speakerphone function (page 34). Otherwise you risk serious, permanent damage to your hearing.

Only use original Siemens batteries (100 % mercury-free) and charging devices. Otherwise you risk serious damage to health and property. The battery could explode, for instance.

Small parts such as the SIM card, sealing stop, lens ring and lens cap can be dismantled and swallowed by small children. The phone must therefore be stored out of the reach of small children

The mains voltage specified on the power supply unit (V) must not be exceeded. Otherwise the charging device may be destroyed.

The power supply must be plugged into an easily accessible AC mains power socket when charging the battery. The only way to turn off the charging device after charging the battery is to unplug it.

Do not use a handheld while driving.

Do not look at the LED (e.g. activated infrared port, flash LED) with optical magnifiers because of the risk of radiation.

This product complies with IEC/EN 60825-1 2 2Safety of Laser Products2 for LED Class 1M products; such products are safe under reasonably foresee-able operating conditions.

# Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_SecurityInfo.fm

#### Safety precautions

6

Do not place the phone near to electromagnetic data carriers such as credit cards and floppy disks. Information stored on them could be lost.

You may only open the phone to replace the battery (100% mercury-free) or SIM card. You must not open the battery under any circumstances. All other changes to this device are strictly prohibited and will invalidate the guarantee.

#### Important

Please dispose of unwanted batteries and phones as permitted by the laws in your country.

The phone may cause interference in the vicinity of TV sets, radios and PCs.

Use only Siemens original accessories. This will avoid potential risks to health or property and ensure compliance with all relevant regulations.

Improper use will invalidate the guarantee! These safety instructions also apply to Siemens original accessories.

Product attributes are subject to changes in technology, design and availability. Siemens reserves the right to modify products without prior notice.

This cellular phone offers a range of functions, it can be used in positions other than the head, such as on the body. In this case, separation distance of **2 cm** is required. When a carry case, belt clip or holder is used for body-worn operation, it should not contain metal and should position the device the above-stated distance from your body.

#### Important

Read this information before using your wireless handheld phone.

As this mobile phone is equipped with a fixed (non-retractable) antenna, some paragraphs in the text below may not be applicable.

#### Antenna care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

# Phone operation

#### Normal position

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

#### Tips on efficient operation

For your phone to operate most efficiently:

- Extend your antenna fully (if applicable).
- Do not touch the antenna unnecessarily when the phone is in use.
   Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

#### Driving

Laws pertaining to the use of mobile phones while driving vary significantly from state to state and sometimes even from locality to locality within states. For example, some areas may allow persons to use their mobile phones only if they employ a hands-free device, and some areas may prohibit the use of cell phones entirely. Accordingly, Siemens recommends that persons check the laws for the areas in which they drive or will be driving. For areas where the use of mobile phones while driving is permitted, Siemens encourages persons to use their phones responsibly and to employ handsfree devices. Also, if using your phone while driving, please:

- Give full attention to driving driving safely is your first responsibility;
- Use hands-free operation, if available:
- Pull off the road and park before making or answering a call, if driving conditions so require.

8

#### Safety precautions

# For vehicles equipped with air bags

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

#### **Electronic devices**

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

#### **Pacemakers**

The Health Industry Manufacturers' Association recommends that a minimum separation of six inches (6") be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

#### Persons with pacemakers

- should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON:
- should not carry the phone in a breast pocket;
- should use the ear opposite the pacemaker to minimize the potential for interference:
- should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

#### Hearing aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider or your hearing aid manufacturer to discuss alternatives.

#### Other medical devices

If you use any other personal medical devices, consult the manufacturers of your devices to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

# Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_SecurityInfo.fm

#### **Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

#### Posted facilities

Turn your phone OFF in any facility where posted notices so require.

#### **Airplanes**

FCC and Airline Regulations prohibit using your phone while in the air. Turn your phone OFF when requested by the airline.

Check and comply with the policy of your airline regarding the use of your phone while the airplane is on the ground.

#### Blasting areas

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

#### Potentially explosive atmospheres

right page (9) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include: fueling areas such as gasoline stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

#### 10 Safety precautions

#### **Emergency calls (SOS)**

Your wireless phone can be used to make emergency calls. You can make an emergency call from the main display screen. Enter the local emergency number such as 911 and then press the key.

This phone, like any wireless phone. operates using radio signals, wireless and landline networks, and userprogrammed functions. Because of this, connections in all conditions cannot be guaranteed. Therefore, you should never rely solely on any wireless phone for essential communications (for example, medical emergencies). Remember - to make or receive any calls, the phone must be switched on and be used in a service area that has adequate signal strength. Emergency calls might not be possible on all wireless phone networks or when certain network services or phone features are in use. Check with local service providers regarding their network features.

Always make certain that your phone is properly charged before attempting any emergency calls. If you allow your battery to discharge, you will be unable to receive or make calls, including emergency calls. You must then wait a few minutes after the charging begins to place any emergency calls.

When making an emergency call, remember to give all of the necessary information as accurately as possible. Remember that your wireless phone might be the only means of communication at the scene of an accident, therefore you should not terminate the call until given permission to do so.

# Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_SecurityInfo.fm

#### **Batteries and Chargers**

Only use original Siemens batteries (100% mercury-free) and charging devices. Use of non-Siemens batteries and/or charging devices may cause explosion resulting in serious injury and/or property damage. Use original Siemens accessories in order to avoid possible injury and property damage and to ensure compliance with applicable laws and regulations. Improper use invalidates the warranty.

#### Battery safety precautions

To reduce the risk of fire, injury or electric shock, and to properly dispose of batteries, please read and understand the following instructions. CONTAINS LITHIUM-ION OR NICKEL-METAL HYDRIDE BATTERY. BATTERY MUST BE RECYCLED OR DIS-POSED OF PROPERLY. DO NOT DIS-POSE IN MUNICIPAL WASTE.

- 1. Only use the batteries specified for use with this mobile phone.
- Do not use batteries of different sizes or from different manufacturers in this mobile phone.
- 3. Do not dispose of the battery in a fire; it may explode. Dispose of used batteries and phones in accordance with applicable laws and safety regulations. Do not expose battery to water. Check with local codes for special disposal instructions.

4. Do not open or mutilate the battery. Doing so may cause damage to the eyes or skin.

right page (11) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

- 5. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conducting material may overheat and cause burns or fire.
- Charge the battery provided with, or identified for use with, this product only in accordance with the instructions and limitations specified in the User's Guide. Do not attempt to charge the battery by any means other than those specified in the User's Guide.

#### 12 Overview of phone

# Overview of phone

#### ① Ø Call key

Dial displayed/highlighted phone numbers/names, take calls. Show last phone numbers dialled in standby mode.

#### On/Off/End key

- Switched off: press and hold to switch on.
- During a conversation or in an application: press **briefly** to finish.
- In menus: press briefly to go back a level.

  Press and hold to go back to standby
- In standby mode: press and hold to switch off phone.

#### 3 Joystick

Press the joystick down vertically to start an application or function

#### In standby mode

- Open main menu.
- Open user profiles.

16 Getting started

# **Getting started**

# Insert SIM card/battery

The service provider supplies you with a SIM card on which all the important data for your line is stored. If the SIM card has been delivered in credit-card size, snap the smaller segment out and remove any rough edges.

Press the grooved area 1, then push the battery cover towards the front in the direction indicated by the arrow 2.

 Place the SIM card flat in front of the slot with the contact surface facing downwards. Then push the SIM card in using gentle pressure
 (ensure that the chamfered corner is in the correct position).

 Insert the battery sideways into the phone 4, then press it downwards 5 until it clicks into position.

 Push the battery cover onto the side hooks ⑦, until it clicks into position.

#### Additional information

Please switch off your phone before removing the battery!

Only 3-V SIM cards are supported. Please contact your service provider if you have an older card.

# **Charge battery**

#### Charging procedure

The battery is not fully charged when delivered. Plug charger cable into the bottom of the phone, plug power supply unit into a mains power socket and charge for at least two hours.

Display during charging.

#### Charging time

An empty battery is fully charged after about 2.5 hours. Charging is only possible within a temperature range of +5 °C to 45 °C (41 °F to 113 °F). If the temperature rises/falls 5 °C (9 °F) above/below this, the charge symbol flashes a warning. The mains voltage specified on the power supply unit must not be exceeded.

18 Getting started

#### **Operating times**

The operating time depends upon the respective conditions of use. Extreme temperatures considerably reduce the phone's standby time. Avoid placing the phone in the sun or on a heater.

Talktime: 100 to 300 minutes Standby time: 60 to 300 hours

#### Charge icon not visible

If the battery has been discharged fully, the charge icon is not immediately visible when the power supply is plugged in. It will appear after up to two hours. In this case the battery is fully charged after 3 to 4 hours.

Only use the plug-in power supply unit supplied!

#### Display while in service

Charge level display during operation (empty-full):

A beep sounds when the battery is nearly empty. The charge level of the battery is only displayed correctly after an uninterrupted charging/discharging cycle. You should therefore not remove the battery unnecessarily and where possible not finish the charging procedure early.

#### Additional information

The power supply unit heats up when used for long periods. This is normal and not

dangerous.

If the battery is removed for longer than 30 seconds, the clock must be reset.

# Switch on/off, PIN entry

# Switching phone on/off

Press and **hold** the On/Off/ End key.

# **Entering the PIN**

The SIM card can be protected with a 4 to 8-digit PIN.

Enter the PIN using the number keys. The characters \*\*\*\* appear to ensure nobody can read your PIN on the display. Correct with ...

Confirm by pressing the joystick. Logging on to the network will take a few seconds.

Additional information
Change PINp. 24
Clear SIM card barringp. 25

# Emergency number (SOS)

#### Only to be used in real emergencies!

By pressing the SOS soft key you can make an emergency call on any network without a SIM card and without entering a PIN (not available in all countries).

# Switching on your phone for the first time

#### Time/date

Set the clock correctly on a one-off basis when getting started.

Press this key, then select Change.

First enter the date (day/month/year), then the time (24 hours, including seconds).

Press. The time and date are updated.

#### Time zones

Set the time zone for your area.

Select the city in the desired time zone from the list ...

... and set it.

#### Copy SIM addresses

The first time the SIM card is inserted, the entries on it can be copied to the Addressbook. Please do not interrupt this procedure. During this time do not accept incoming calls. Follow instructions in the display.

You can also copy data from the SIM card at a later time (p. 44).

20 General instructions

# General instructions

#### Standby mode

The phone is in standby mode and is ready for use when the name of the service provider appears on the display.

Press and hold the On/Off/ End key to return to standby mode from any situation.

#### Signal strength

Strong receiving signal.

A weak signal reduces the call quality and may lead to loss of the connection. Change your location.

# Digital Rights Mgmt. (DRM)

Remember that your phone has Digital Rights Management. The use of downloaded pictures, sounds or applications can be restricted by the suppliers, e.g. copy protection, use for a limited period of time only, number of times it can be used etc. (see also p. 81).

#### Main menu

The main menu is displayed graphically with symbols:

Call up from standby mode.

Select the application symbols.

Start an application.

#### Main menu options

Options Open menu.

Different functions are available depending on the context.

# **Operating instructions**

#### Menu controls

The steps needed to reach a function are shown in a **condensed form** in this user guide, e. g., to display record of missed calls in condensed form:

→ 🗓 🗘 → Missed calls

opened.

This comprises the following steps:

Open main menu.

Select (highlight) \( \begin{align\*} \begin{align\*} \text{by} \\ \text{moving the joystick} \\ \text{upwards, then press vertically down on the joystick} \\ \text{before using the joystick} \\ \text{to highlight Missed calls.} \\ \ext{Confirm. The record is} \end{align\*}

# Symbols

The following symbols are used to explain operation:

Enter numbers or letters.

On/Off/End key

Call key

Soft keys

Displays a soft-key function.

The joystick can be moved in 5 directions.

Press the joystick vertically, e.g., to call up the menu.

Press the joystick in the direction indicated.

Function dependent on service provider, may require special registration.

22 Standard functions

# **Standard functions**

### **Option menus**

Functions which appear repeatedly in the options menu are listed here.

Options Open menu

Options O	pen menu.
Edit	Open the entry to edit.
View	Display entry.
Delete/ Delete all	Delete entry / delete all entries after confirmation.
New entry	Create new entry.
Send	Select transmission service and medium for sending.
Reply/ Reply to all	The sender becomes the recipient. The received text is transferred into the new message.
Save	Store entry.
Save to 🦪	Save recipients in the current address directory.
Sort	Set sort criteria (according to alphabetical order, type, time).

Text input (p. 26)	T9 preferred: Activate/ deactivate T9 input.
	Input language: Select language for text.
Rename	Rename selected entry.
Capacity	Display memory capacity.
Attributes	Display properties of the highlighted object.
Help	Display help text.

# **Highlighting mode**

With some applications (e.g. Phone-book/Addressbook) one or more entries in a list can be highlighted to carry out a function jointly.

Options Open menu.

Mark Activate highlighting mode.

If a **non-highlighted** entry is selected, this can be highlighted:

Mark The current entry is high-lighted.

If a **highlighted** entry is selected, the highlighting can be deleted:

Unmark Dehighlight the current entry.

Additional highlighting functions:

	5 5 5
Mark all	Highlight all entries.
Deselect all	Delete highlighting on all marked entries.
Delete marked	All selected entries are deleted.

# Menu speed dialling

All menu functions are numbered internally. A function may be selected directly by entering these numbers in sequence. These numbers are shown in the top right of the display.

E.g., write new SMS (from standby mode):

right page (23) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (30.09.2005,

Press to display the main menu. Then press

for Messages, then for Create new, then

for SMS.

Security

# **Security**

The phone and SIM card are protected against misuse by several security codes.

Keep these security codes in a safe place where you can access them again if required.

Protects your SIM card

(nersonal identification

#### Codes

PIN

Phone

code

	number).
PIN2	This is needed to set the charge detail display and to access additional functions on special SIM cards.
PUK PUK2	Key code. Used to unlock SIM cards after the wrong PIN has been entered repeatedly.

setting.

Protects your phone. Must be

entered at the first security

- → 52 → Security
- → Codes
- → Select function.

#### PIN control

The PIN is usually requested each time the phone is switched on. You can deactivate this feature but you risk unauthorised use of the phone together with your SIM card. Some service providers do not permit deactivating the control.

Enter PIN.

Confirm input.

Press.

Confirm.

#### Change PIN

You can change the PIN to any 4 to 8-digit number you find easier to remember.

Enter current PIN.

Press.

Enter new PIN.

Repeat **new** PIN.

- → (C) → Security
  - → Codes
  - → Select function.

#### **Change PIN2**

(Display only if PIN2 is available)

Proceed as for Change PIN.

#### Chq.phonecode

(Change phone code)

You define the phone code (4 to 8 digits) when you call up a phone-code protected function for the first time (e.g. Direct call, p. 37). It is then valid for all phone codeprotected functions. Following the third unsuccessful attempt, access to the phone code and the functions that use it is denied. If this occurs, contact the Siemens Service (p. 126).

# Clear SIM card barring

If the PIN is entered incorrectly three times, the SIM card is barred. Enter the PUK (MASTER PIN) provided by your service provider with the SIM card in accordance with the instructions. If the PUK (MASTER PIN) has been lost, please contact your service provider.

#### Preventing accidental activation

Even if PIN control is deactivated (p. 24) confirmation is required to switch on the phone.

This prevents accidental activation of the phone, e.g. when you are carrving it in a bag or when you are travelling in an aircraft.

right page (25) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (30.09.2005,

#### T9 word suggestions

If several options are found in the dictionary for a key sequence (a word), the most probable is displayed first. If the word you want has not been recognised, the next suggestion from T9 may be correct.

The word must be shown highlighted. Then press

The displayed word is replaced with a different word. If this word is also incorrect, press

Press until the correct word is displayed.

If the word you want is not in the dictionary, it can also be written without T9.

To add a word to the dictionary:

Select.

The last suggestion is deleted and the word may now be entered without T9 support. Press Save to add it automatically to the dictionary.

#### Correct a word

Move left or right, word by word, until the required word is highlighted.

Scroll through the T9 word suggestions again.

Deletes the last character in a word **and** displays a new possible word.

#### Additional information

Within a "T9 word", individual letters may not be edited without first removing the T9 status. In most cases it is better to rewrite the complete word.

Set a full stop. The word is concluded if it is followed by a space. Within a word, a full

Moving the cursor to the right ends the word

Press briefly: Swap between abc, Abc, T9abc, T9Abc, 123. Status shown in top line of display.

Press and hold: All input modes are displayed.

Press briefly: Select special characters (p. 26).

Press and hold: Opens input menu (p. 27).

#### Text modules

Text modules can be stored in the phone for adding to your messages (SMS, MMS, e-mail).

#### Write Text modules

→ Text modules

# My phone

Adjust your phone according to your own wishes in the following ways to give it a personal touch:

#### Ringtones (p. 88)

Assign individual ringtones to caller groups or special dates.

#### Pictures (p. 118)

Assign individual pictures or photos to your Addressbook entries.

#### Animations (p. 87)

Choose a start-up and closing animation as well as a personal greeting.

#### Screensaver (p. 86)

Choose an analogue or digital clock, or a personal picture.

#### (Operator) Logo (p. 86)

Choose an individual picture (to be displayed in standby mode).

#### Wallpaper (p. 86)

Choose your own permanent background image.

#### Colour scheme (p. 86)

Select a colour scheme for the user interface.

#### Applications (p. 80)

Download your own applications from the Internet.

#### Where do I get what?

You can purchase additional ringtones, logos, animations and Java applications from your service provider or directly from Siemens.

#### Service provider portal

Depending on your service provider, you will find direct access to his portal on your telephone via menu items or bookmarks. Please contact your service provider for more information on these services.

#### **Siemens City Portal**

You will find additional ringtones, logos, animations and screensavers as well as more application, games and services on the Internet at this address:

#### www.siemens.com/mobilephones

Or you can download them directly via Browser:

#### wap.siemens.com

You will also find a service for saving data here as well as a list of the countries in which these services are available.

#### My menu

Create your own menu (p. 102) with frequently used functions, phone numbers or Browser pages.

# **Calling**

# Dialling with number keys

The phone must be switched on (standby mode).

Enter the number (always with dialling code/international dialling code).

Press the Call key. The displayed phone number is dialled.

#### End call

Press the End key **briefly**. Press this key even if the person on the other end of the line has hung up first.

#### Set volume

Regulate the volume (only possible during a call).

If a Car Kit is used, its volume setting will not affect the usual setting on the phone.

#### Redial previous numbers

To redial the phone number **last** called:

Press the Call key twice.

To redial other numbers that were dialled previously:

Press the Call key once.

Pick out the phone number from the list, then to dial press the ... Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_Phone.fm

... key.

Calling

33

# If the number is busy

If the called number is busy or cannot be reached because of network problems several options are available (depending on the service provider). An incoming call or any other use of the phone interrupts these functions.

#### Either

#### Auto, redial

Auto dial The phone number is dialled automatically up to ten times at increasing time intervals. End with:

End key.

#### Or

#### Call back

Your phone rings when the busy number is free. Press the Call key to dial the number.

#### Reminder

right page (33) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

A beep reminds you to redial the displayed phone number after 15 minutes.

#### Additional information

Store phone number in the Addressbook/Phonebook. Switch on Handsfree (playback through loudspeaker).

Always switch off "handsfree talking" before holding the phone to your ear. This will avoid damage to your hearing. Press and hold to switch

microphone off. International dialling codes

Ø!

Press and hold until a "+" is displayed.

Press and select country.

#### Phone number memo

You can enter a phone number during the call. The person to whom you are speaking can hear these entries. When the connection has ended you can save or dial the phone number.

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\c72\_Phone.fm

#### Accept call

The phone must be switched on. An incoming call will interrupt any other use of the phone.

Press.

Or

Press.

A phone number transmitted by the network is displayed, along with the associated name (where applicable with picture) if this is stored in the Phonebook/Addressbook (p. 40).

# Reject call

Press.

Or

Press briefly.

#### Warning!

Please make sure you have accepted the call before holding the phone to your ear. This will avoid damage to your hearing from loud ringtones.

#### Additional information

46 Camera

# Camera

You can view photos recorded on the integrated camera immediately and

- · use the photo as a background image, logo, a switch on/off animation or a screensaver.
- send the photo via MMS or e-mail.

# Switch on

Or

Start camera in standby mode.

The current (preview) image is displayed. You will see the following in the first line from left to right:

**Briahtness** 

Zoom factor

White balance

Flash connected.

The number of photos that can still be taken in the selected resolution is displayed in the top right-hand corner of the preview image. As the memory requirement depends essentially on the subject photographed and the resolution, the number of photos that are still possible can sometimes change unexpectedly. Information about the selected resolution is located under the preview image.

# Record

Takes a photo.

Displays the preview image of the next photo.

The photo is saved with a name, the date and the time. To enter the name see Setup in the options menu. Settings prior to taking a photo:

Sets the brightness.

Sets the zoom factor.

# Image resolution

It is possible to set the quality of the image regardless of the preview image resolution, e.g.:

Premium

Medium

Background

The resolution may decrease depending on the selected digital zoom.

# Flash (accessories)

If the flash is active, this is shown by a symbol in the display. The flash is charged constantly while it is connected to the phone and the camera is activated. This reduces the standby time.

This symbol appears when the flash is being charged.

For settings, see options menu.

# Camera options

Enter currency.

# Charge/Unit

(PIN2 prompt)

Enter the currency as well as the charge per unit and time.

### **Account limit**

(PIN2 prompt)

Special SIM cards allow you or the service provider to define a credit limit or a period after which the phone is barred for outgoing calls.

Edit

Press.

Enter PIN2.

Account limit

Switch on.

Confirm.

Enter number of units.

Then confirm the credit or reset the counter. The status display for prepaid cards may vary, depending on the service provider.

# Auto display

Call duration and charges are displayed automatically.

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_TimeCharge.fm

50 Main Inbox

# **Main Inbox**

The inbox folder offers immediate access to the messages just received. This means that you no longer have to look through all inbox folders for the various message types. The entries are marked with a symbol to indicate their type and status. You will find a list of the symbols on p. 14.

To call up the inbox folder, e.g. if a new SMS has been received:

Press the soft key beneath the symbol.

### Or

In standby mode:

You will find the following message types in the inbox folder:

SMS, MMS, E-mail

# System messages

Message about MMS, Missed alarm, Missed appts., Missed calls, WAP push, Voice message

### Data objects

Ring tones, Pictures, Calendar entries, Notes and Business card

When you open an entry, the relevant application also starts.

After a set period of time, entries which have already been read and opened are only displayed in the message-related inbox lists (see Setup in the optionsmenu).

# Main Inbox options

Options Open menu.

Receive e-mail	Connect to set account and send all e-mails.
Setup	If entries have been read, remove them from the Main Inbox:
	Daily, Never, Immediately
	If Daily has been selected, specify the time.

(For standard functions see p. 22)

# **SMS**

You can transmit and receive very long messages (up to 760 characters) on your phone. They are automatically composed of several "normal" SMS messages (note higher charges). The maximum possible length of an SMS is reduced if you use special letters from some languages. If you do not wish to use these letters then change the input language in the options menu.

You can also insert simple pictures and sounds in an SMS.

# Write/send

Input text.

You will find information on writing texts with and without T9 in the chapter "Text entry" (p. 26).

The following is displayed in the top display line: Text entry status, number of SMS messages required, number of characters still available.

Start sending procedure.

right page (51) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

The Message sent. message only Indicates transmission to the service centre. This will then attempt to relay the message within a certain period.

See also Validity period (p. 55).

### Phone number in SMS

Phone numbers displayed in highlighted text can be dialled ( ) or saved in the Phonebook/Addresshook

# Downloading ringtones and logos

You can receive links for downloading ringtones, logos, screensavers, animations and information about applications with an SMS. Please highlight this link and, by pressing the Call key , start the download. Please check that the dial-in access (p. 95) is configured.

Remember that these may be protected (DRM, p. 20).

If the message icon flashes the SIM memory is full. **No** more SMS messages can be received. Messages must be deleted or archived.

# Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_MMS.fm

(U)

# **MMS**

The Multimedia Messaging Service enables you to send texts, pictures and sounds in a combined message to another mobile phone or to an email address. All elements of an MMS message are merged to form a "slide show".

Depending on your phone's settings, you will receive either the complete message automatically or notification that an MMS has been saved in the network, giving sender and size details. You may then download it to your phone to read it.

Ask your service provider whether this service is available. You may need to register for this service separately.

# Create

An MMS consists of the address header and the content.

An MMS may consists of a series of pages. Each page may contain a text, a picture and a sound. Remember that pictures and sounds may be protected (DRM, p. 20).

Write texts with the help of T9 (p. 26).

Pictures may be taken using the integrated camera and/or loaded from My stuff (p. 118).

Sounds may be recorded using the Sound recorder and/or loaded from My stuff (p. 118).

First select an object for processing to be added to the first page of the MMS.

### **Pictures**

# Voice message/mailbox

Most service providers provide a mailbox in which a caller can leave a voice mail for you

- if your phone is switched off or not ready to receive,
- if you do not want to answer,
- if you are making a phone call (and if Call waiting (p. 90) is not activated).

If the voice mail service is not part of your service provider's standard package, you will need to register for it, and possibly set it manually. The following sequence may vary from service provider to service provider.

# Setup

⊗!

The service provider supplies you with two phone numbers:

### Save mailbox number

You call this phone number to listen to the voice mails left for you.

Confirm.

### Save call divert number

Calls are diverted to this phone number.

Enter phone number.

Registration with the network is confirmed a few seconds later.

# Listen to message

A new voice message can be announced as follows, depending on the service provider:

Symbol plus beep.

Or

Notification via SMS.

Or

You receive a call with an automatic announcement.

Call your mailbox and play the message(s) back.

Press and **hold** (if necessary enter mailbox number once). Confirm with OK and Mailbox depending on your service provider.

# Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_Instantmsg.fm

# **Chat room**

With this function you can transfer text, audio clips, pictures and files straight to and from one or more terminals (mobile phone, PC). This function is not offered by all service providers. Please ask your service provider about this.

Your dialogue partners are entered in contact lists. When a connection has been established, these lists show who is available, whether they want to be disturbed and what mood they are in.

### Additional information

You can use the browser to download applications (e.g. ringtones, games, pictures, animations) from the Internet.

Siemens excludes all warranty and liability claims in respect of or in connection with any applications subsequently installed by the customer and any software not included in the original delivery package. This also applies to functions enabled subsequently at the customer's instigation. The purchaser bears sole risk for the loss of, damage to, and any defects arising in this device or the applications and for any direct damage or consequential damage of whatever nature resulting from the use of this application. For technical reasons, such applications and subsequent enabling of certain functions are lost in the event of the device being replaced/re-supplied and may be lost if it is repaired. In such cases, the buyer is required to download or release the application again. Please ensure that your phone has Digital Rights Management (DRM) so that downloaded applications are protected from unauthorised reproduction. These applications are then exclusively intended for your phone and cannot be transferred from this even to create a backup. Siemens does not warrant, quarantee or accept any liability for the customer's ability to download or enable applications again or to do so free of charge. We recommend that you carry out a back from time to time of the applications on your PC using the "Mobile Phone Manager" (MPM, p. 120) . You can download the relevant latest version of the MPM from the Internet at: www.siemens.com/c72.

Ø!

Your phone has an infrared interface. With this interface, you can exchange data such as pictures, ringtones. Addressbook entries, business cards or organiser data with other devices which also have an infrared interface.

The infrared interface is on the left side of the phone. The distance between the two devices must not exceed 30 cm. The infrared windows in both appliances must be aligned as accurately as possible with each other.

Shown on the display:

IrDA activated.

**D**)))

During transmission.

### Data services

Basic setting and activation of the connection profiles for data transmission such as MMS, WAP.

The phone default setting varies from service provider to service provider.

- · The settings have already been implemented by the provider. You can start immediately.
- Access profiles have already been created by your provider. Then select profile and activate.
- The access profiles must be configured manually.

### 96

If necessary, check with your service provider for details. You will also find the current settings for the service provider on the Internet at this address:

www.siemens.com/ mobilephonescustomercare in the FAQ section.

Setup

### Select profile

Select the profile.

Confirm selection.

### Set profile

Select the profile.

Open menu.

Open the selection.

Select CSD settings, and/or GPRS settings.

Make the settings as specified by your service provider.

# HTTP profile

The phone default setting varies from service provider to service provider.

- The settings have already been implemented by the provider. You can start immediately.
- Access profiles have already been created by your provider. Then select and activate profile.
- The access profiles must be configured manually.

If necessary, check with your service provider for details. You will also find the current settings for the service provider on the Internet at this address:

www.siemens.com/ mobilephonescustomercare in the FAQ section.

Make the settings.

### **Authentication**

Activate or deactivate encrypted Internet dial-up (CSD connections only).

(U)

# Security

# Auto key lock

The keypad is locked automatically if no key has been pressed for one minute in standby mode. This prevents the phone from being used accidentally. However, you can still be called and you can still make an emergency call.

### Additional information

The keypad can also be directly locked and unlocked in idle state.

Press and hold.

### Direct call

(Phone-code protected)

Only one phone number can be dialled (see also p. 37).

# Only 🗂

right page (97) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

(PIN2 or phone-code protected)

Dialling options are restricted to SIM-protected phone numbers in the Phonebook. If only area codes are entered, relevant phone numbers can be added to these manually before dialling.

If the SIM card does not support PIN2 input, the whole Phonebook can be protected with the phone code.

# This SIM only

(Phone-code protected)

The phone can be connected to a SIM card when the phone code is entered. Unless the phone code is known the phone will not operate with a different SIM card.

If the phone is to be used with a different SIM card, enter the phone code when requested.

### Codes

For description see p. 24:

PIN control, Change PIN, Change PIN2, Chq.phonecode

**β**!

98

Setup

# **Barring**

Barring restricts the use of your SIM card (not supported by all service providers). You need a 4-digit network password for network barring. Your service provider will give you this password. You may need to be registered separately for each barring.

### All outgoing

All outgoing calls except emergency numbers are barred.

### Outgoing intl.

(International outgoing)
Only national calls can be made.

### Out.int.x home

(International outgoing without home country)

International calls are not permitted. However you can make calls to your home country when abroad.

### All incoming

The phone is barred for all incoming calls (forwarding all calls to mailbox provides a similar effect).

## When roaming

You do not receive calls when you are outside your home network. This means that no charges are incurred for incoming calls.

### Status check

The following information can be displayed after a status check:

Barring set.
Barring not set.
Status unknown
(e. g. new SIM card).

### Clear all

All barrings are deleted. A password which the service provider will give you is necessary for this function.

right page (99) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

# Network

→ Select function.

### Line

Ø!

This function is only displayed if it is supported by the service provider. Two separate phone numbers must be registered on the phone.

### Select line

Select the currently used phone number.

Display current phone number in standby mode.

### Protected

(Phone-code protected)

You may limit usage to one phone number.

### Additional information

Special settings may be made for each phone number (e.g., melody, call divert etc.) To do this, first switch to the required phone number.

Switch from phone number / connection in standby mode:

Press.

Press

### Network info

The list of GSM networks currently available is displayed.

Indicates non-authorised service providers (depending on SIM card).

Setup

99

### Choose netwrk

Network search is restarted. This is useful if you are not on your home network or want to register on a different network. The network list is rehuilt when Auto network is set.

### Auto network

Activate/deactivate, see also Choose netwrk above. If "Automatic network" is activated, the next network on the list is dialled in ranking order of your "preferred networks". Otherwise a different network can be selected manually from the list of the available GSM networks.

### Preferred net

Enter your preferred service providers here for when you leave your home network (e.g. if there are differences in price).

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_Network.fm (U)

### 100

### Setup

Your service provider is displayed:

List

Display list of preferred networks.

Create/change entry:

<Empty>

or select an existing entry, then select a new service provider in the list and confirm.

Record new service provider (last entry in the list):

Furth.network

Select, enter the provider data and save it.

### Additional information

If you are outside your home network, your phone automatically dials another GSM network.

If the signal strength of the preferred network is inadequate when you switch on the phone, the phone may register in a different network. This can change when the telephone is next switched on or if another network is selected manually.

### **Band selection**

Select either GSM 900, GSM 1800 or GSM 1900.

### Fast search

When this function is active, network reconnection is speeded up (standby time is reduced).

# **User group**

Depending on the service provider, you can create groups with this service. These can have access to internal (company) information, for example, or special tariffs apply. The details can be clarified with your service provider.

### Active

Activate/deactivate function. "User group" must be deactivated for normal phone use.

### Select group

You can select or add groups other than preferred groups (see below). Code numbers for the groups are obtained from your service provider.

### All outgoing

In addition to network control for a user group, it is possible to set whether outgoing calls outside the group are permitted. If the function is deactivated, only calls within the group are permitted.

### Pref. group

If activated, calls may only be made within this standard user group (depending on the network configuration).

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_Network.fm

# **Accessories**

Accessories → Select function.

### Car Kit

Only in combination with an original Siemens handsfree car kit (see accessories). The car kit profile is activated automatically when the phone is inserted into the cradle.

### Auto answer

(factory default: off)

Calls are accepted automatically after a few seconds. Eavesdropping

is possible!

Shown on the display.

### Automatic switch off

(factory default: 2 hours)

The phone is powered by the car's power supply. You can adjust the time between switching off the ignition and the phone switching off automatically.

### Car loudspk.

Improves playback in certain circumstances.

### Automatic settings

right page (101) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

- · Permanent illumination: switched on.
- · Key lock: switched off.
- Charging the phone battery.
- · Auto. activation of car kit profile when the phone is inserted.

### Headset

Only in conjunction with an original Siemens headset (see accessories). If an original Siemens headset is used the profile is activated automatically when the headset is plugged in.

### Auto answer

(factory default: off)

Calls are accepted automatically after a few seconds (except where the ringer is switched off or set to beep). You should therefore be wearing the headset.

### Automatic setting

Accept call with Call key or ptt key (push to talk), even when the auto key lock is activated.

### Auto answer

If you do not notice that your phone has accepted a call, there is the danger that the caller may eavesdrop.

My menu

# My menu

Press.

Press.

Create your own menu with frequently used functions, phone numbers or Browser pages.

The list of 10 entries is preset. You can, however, change it as you wish.

# Use

Select the required entry.

Confirm.

### Or

If the entry selected is a phone number, you can also call it with the Call key.

# Change menu

You can replace each entry (1–10) with another entry from the selection list.

Change

Select the required entry.

The function list is opened for selection.
Select the **new** entry from

Confirm. The entry is saved.

the list.

If Phonebook is selected, the phone number must also be selected; if Internet is selected, the bookmark must also be selected.

# Reset all

(Telephone code required)

Select. Following confirmation, the pre-assignment is reset.

# **Fast access**

You can assign one important phone number or a function to each one of the two soft keys and number keys 2 to 9 (speed-dial numbers). The phone number can then be dialled or the function started at the touch of a button.

### Additional information

The service provider may have already assigned functions to a soft key (e.g., access to "SIM services" or direct call-up of the Internet portal). It may not be possible to modify this key assignment.

The left soft key may sometimes be replaced automatically by A oo to access a new message, for example.

# Soft keys

# Change

For example, the Internet function is assigned to the soft key. To change this (in standby mode):

Press briefly.

Scroll to new assignment in the list.

Confirm.

- Special case Phone number. Pick out a name from the Phonebook/ Addressbook for assignment to the key.
- Special case Bookmark. Scroll to a URL in the bookmark list for assignment to the key.

# **Apply**

In standby mode:

### Application

The "Internet" is just used as an example here.

Press and **hold**; the application is started.

### Phone number

The setting "Carol" is used here only as an example.

**Press and hold**, the phone number is dialled.

# Speed dialling keys

Number keys 2 to 9 can be used as speed dialling numbers for fast access. Number key 1 is reserved for the mailbox phone number (p. 68) and number key 0 is reserved for switching over two connections during use (p. 99).

# Change

In standby mode:

Press number key **briefly** (e.g. the 3).

Press.

Select a new function from the list and confirm with **OK**.

Or

An assignment has already been made to this key (assignment displayed above the right soft key):

Press briefly.

Scroll to application in the list.

Confirm.

- Special case Phone number. Pick out a name from the Phonebook/ Addressbook for assignment to the key.
- Special case Bookmark. Scroll to a URL in the bookmark list for assignment to the key.

# **Apply**

Select a stored phone number or start a stored application (e.g. Internet).

In standby mode:

Press **briefly**.

The assignment of the number key 3 is displayed above the right soft key e.g.:

Internet

Press and hold.

Or simply

Press and hold.

120 Mobile Phone Manager

### Mobile Phone Manager

The MPM (Mobile Phone Manager) enables you to use extended phone functions from your PC. The phone and PC communicate via a data cable (see Accessories, p. 130) or IrDA.

You can download the latest version of the MPM software from the Internet at:

www.siemens.com/c72

### Organiser

You can use the organiser to manage the contacts and appointments you have stored in your phone and synchronise them between your phone, Outlook® and other Siemens phones (including Gigaset). You can use all Call Control functions from the organiser.

### **Call Control**

You can dial straight from the organiser at the click of a mouse. It also makes establishing and managing conference calls extremely easy – the parties to the call are displayed on-screen in a virtual conference room, allowing you to swap effortlessly between the conference call and a private call and to call and add new subscribers at the click of a mouse.

### SMS and MMS management

Write EMS and SMS messages from the convenience of your PC. Use all the options your PC offers you and use your sounds and pictures to create SMS and EMS messages. You can read, forward, print, delete and archive your messages.

### Backup and restore

With the back-up function, you can regularly make a back-up copy of your phone data on the PC. If you ever lose the data on your phone, or replace the phone, you can quickly re-instate all data with the restore function. Please observe any possible restrictions for DRM-protected data.

### **Bookmark Management**

Use your PC to browse on the Internet and define your preferred Internet sites. Save the Internet addresses as bookmarks on your phone so that you can quickly call them up at a later time when you are on the move.

### Phone explorer

right page (121) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (30.09.2005,

You can access the data in your phone quickly and easily with the Phone Explorer. The phone is simply integrated in the data structure of your PC and handled exactly as if it was another folder in your PC.

### Mobile Modem Assistant

The Mobile Modem Assistant quickly and easily establishes an Internet connection via your mobile phone enabling you to use your PC at home or when travelling to surf the Internet.

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\C72\_PhoneManager.fm

### 122 Mobile Phone Manager

### Picture and photo processing

Picture/photo processing offers you the opportunity to conveniently create, edit and manage pictures and photos. Filters and effects are offered to help you create colourful, attractive graphics. The user-friendly interface makes child's play of transferring pictures/photos from or to the mobile phone, and of changing the graphic settings.

### My stuff

My stuff offers you a convenient option for managing ringtones, music, playlists and videos. You can store your music files in your phone automatically converting them into a suitable format.

### Plug & Sync

Plug & Sync carries out your routine tasks for you as you wish. With "Music > phone" you can always copy your latest tracks and playlists automatically to your phone. With "Photos > PC" you can transfer your newly taken photos to your PC.

### **SmartSync**

With SmartSync you can always synchronise your data with Outlook®, OutlookExpress® or Lotus Notes™ as soon as the phone is connected to a PC. New and changed contacts are synchronised in just the same way as messages and appointments.

### **Notifier**

If your phone is connected to a PC you will always be notified on the PC screen, if required, about incoming calls or messages – even when the phone is switched to mute.

If you have any questions on the use of your phone, you can contact us at www.siemens.com/mobilephonescustomercare around the clock. As further help we have listed below some frequently asked questions and answers.

right page (123) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (28.09.2005,

B		
Problem	Possible causes	Possible solution
Phone cannot be switched on.	On/Off key not pressed long enough.	Press On/Off key for at least 2 seconds.
	Flat battery.	Charge battery. Check charging indicator in the display.
	Battery contacts dirty.	Clean contacts.
	See also below under "Charging error".	
Too little standby time.	Frequent use of applications such as organiser, games, camera.	Restrict use if applicable.
	Fast search activated.	Deactivate fast search(p. 100).
	Display illumination switched on.	Switch off display illumination (p. 87).
	Unintentional keystrokes (illumination!).	Activate key lock (p. 97).
Charging error (charge icon not displayed).	Battery totally discharged.	Plug in charger cable, battery is on charge.     Charge icon appears after approx. 2 hours.     Charge battery.
	Temperature out of range: +5 °C to +40 °C.	Make sure the ambient temperature is right, wait for a while, then recharge.
	Contact problem	Check power supply and connection to the phone. Check battery contacts and telephone connection socket, clean them if necessary, then insert battery again.
	No mains voltage.	Use different mains power socket; check mains voltage.
	Wrong charger.	Only use original Siemens accessories.
	Battery faulty.	Replace battery.
SIM error.	SIM card not inserted correctly.	Check that the SIM card is inserted correctly (p. 16).
	Dirty SIM card contacts.	Clean SIM card with a dry cloth.
	SIM card with wrong voltage.	Use 3V SIM cards only.
	SIM card damaged (e.g., broken).	Carry out a visual check. Ask service provider to change SIM card.

### 124 Questions & Answers

Problem	Possible causes	Possible solution
No network	Weak signal.	Move higher, to a window or an open space.
connection.	Outside GSM range.	Check service provider's coverage area.
	Invalid SIM card.	Complain to the service provider.
	New network not authorised.	Try manual selection or select a different network (p. 99).
	Network call barring is set.	Check network barrings (p. 98).
	Network overloaded.	Try again later.
Phone loses network.	Signal too weak.	Reconnection to another service provider is automatic (p. 99). Switching phone off and on again can speed this up.
Calls not possible.	Second line set.	Set first line 2000 (p. 100).
	New SIM card inserted.	Check for new barrings.
	Charge limit reached.	Reset limit with PIN2 (p. 49)
	Credit used up.	Load credit.
Certain uses of phone not possible.	Call restrictions are in place.	Barrings can be set by service provider. Check barrings (p. 98).
Impossible to make entries in Phone-book/Addressbook.	Phonebook/Addressbook is full.	Delete entries in the Addressbook (p. 39)/Phonebook (p. 41).
Voice message not functioning.	Call divert to mailbox not set.	Set call divert to mailbox (p. 68).
flashes to indicate an SMS.	SMS memory is full.	Delete SMS or archive (p. 54).
[ ] flashes to indicate an MMS.	MMS memory is full.	Delete MMS.
flashes to indicate an MMS.	Phone memory full.	Delete messages, pictures, games or applications.
Function cannot be set.	Not supported by service provider or registration required.	Contact your service provider.
Capacity problems with, for example, Games & More, ringtones, pictures, SMS archive.	Phone memory full.	Delete files in the relevant areas. You can use the memory assistant to delete specific files (p. 93).
No Browser access, downloading not possible.	Profile not activated, profile settings wrong/incomplete.	Activate or set Browser profile (p. 79). If necessary ask your service provider.

Problem	Possible causes	Possible solution	
Text message can- not be sent.	Service provider does not support this service.	Contact your service provider.	
	Phone number for service centre not set or incorrectly set.	Set service centre (p. 55).	
	SIM card contract does not support this service.	Contact your service provider.	
	Service centre too busy.	Repeat message.	
	Recipient does not have a compatible phone.	Check.	
EMS pictures & sounds are not displayed on the destination phone.	Destination phone does not support the EMS standard.		
No Internet access possible.	Incorrect Browser profile set, or wrong or incomplete settings.	Check Browser settings (p. 79); contact your service provider if necessary.	
PIN error/ PIN2 error.	Three wrong entries.	Enter the PUK (MASTER PIN) supplied with the SIM card according to the instructions. If the PUK (MASTER PIN) has been lost, contact your service provider.	
Phone code error.	Three wrong entries.	Contact Siemens Service (p. 126).	
Service provider code error.	No authorisation for this service.	Contact your service provider.	
Missing/too many menu entries	Functions may have been added or deleted by the service provider via the SIM card.	Check with your service provider.	
Charge meter does not work	Charge pulse is not being transmitted.	Contact your service provider.	
Damage			
Severe shock	Remove battery and SIM and re-insert them. Do not dismantle the phone!		
Phone became wet.	Remove battery and SIM. Dry immediately with a cloth, but do not apply heat. Dry connector contacts thoroughly. Stand mobile upright in an air current. Do not dismantle the phone!

### 126 Customer Care

### **Customer Care**

We offer fast, individual advice! You have several options:

Our online support on the Internet:

### www.siemens.com/ mobilephonescustomercare

We can be reached any time, any place. You are given 24 hour support on all aspects of our products. Here you will find an interactive fault-finding system, a compilation of the most frequently asked questions and answers, plus user guides and current software updates to download.

When calling customer service, please have ready your receipt and the phone identity number (IMEI, to display press \*#06#), the software version (to display, press \*#06#, then More) and if available, your Siemens Service customer number.

In some countries repair and replace services are impossible where the products are not sold through our authorised dealers.

If repair work is necessary, please contact one of our service centres:

**Customer Care** 

### Care and maintenance

Your phone has been designed and manufactured to the highest of standards and should be treated with great care. The suggestions below will help you to enjoy your phone for many years.

- Protect your phone from moisture and humidity. Precipitation, humidity and liquids contain minerals that will corrode electronic circuits. Nevertheless, should your phone become wet, disconnect it immediately from the power supply to avoid electric shock. Do not place your phone (even to dry it) on/in a source of heat such as a microwave oven, oven or radiator. The phone may become overheated and possibly explode.
- Do not use or store the phone in dusty, dirty areas. Its moving parts may be damaged and the casing may become deformed and discoloured.
- Do not store your phone in hot environments (e.g. vehicle instrument panel in the summer). High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
- Do not store your phone in cold environments. When the phone warms up again (to its normal ambient temperature), moisture can form inside the phone, which may damage electronic circuit boards.
- Do not drop, knock or shake your phone. Rough handling can damage internal circuit boards!
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the phone!

The suggestions given above apply equally to your phone, battery, charger and all accessories. If any of these parts is not working properly, obtain fast and reliable help at our service centres.

### **Battery quality statement**

The capacity of your mobile phone battery will reduce each time it is charged/emptied. Storage at too high or low temperatures will also result in a graduly capacity loss. As a result the operating time of your mobile phone may be considerably reduced, evan after a rull recharge of the battery.

Regardless of this, the battery has been designed and manufactured so that it can be recharged and used for six months after the purchase of your mobile phone. After six months, if the battery is clearly suffering from loss of performance, we recommend that your replace it. Please buy only Siemens original batteries.

### Display quality declaration

For technological reasons, a few small dots with different colours may appear in the display in exceptional cases.

Just remember that the appearance of brighter or darker dots generally does not mean that a fault has occurred.

Siemens AG 2003, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\Maintenance.fm

### **Product data**

### **Declaration of conformity**

BenQ Mobile hereby declares that the phone described in this user guide is in compliance with the essential requirements and other relevant provisions of European Directive 1999/5/EC (R&TTE). The relevant declaration of conformity (DoC) has been signed. Please call the company hotline if you require a copy of the original: www.siemens.com/mobiledocs

### **Car Solutions**

### Mobile Holder HMH-660

Cradle without antenna port.

### Mobile Holder Antenna HMH-665

The cradle for connecting an external antenna. Ideal for use with Headset PTT or Car Kit Portable.

right page (131) of C72 Cormorant FUG, 105x143, us-en, A31008-H7850-A1-1-7619 (30.09.2005,

Can also be used as cradle for retrofitting your handsfree car kit (series 55).

### Car Kit Comfort Basic HKC-700

Handsfree car kit with first-class digital call quality and supreme ease of use. Includes all components needed for installation. The individual antenna solution is available in specialist shops.

### Car Kit Easy HKP-700

Facilitates convenient handsfree talking with high call quality. With the integrated, rotating cradle and the flexible microphone positioning, the phone can be optimally adjusted to suit any vehicle interior. The power is supplied via the cigarette lighter socket.

### Car Kit Portable HKP-500

The portable handsfree car kit can easily be moved from one car to another. Simply plug into the cigarette lighter socket, connect, and talk.

SAR

### SAR

INFORMATION ON RF EXPOSURE/ SPECIFIC ABSORPTION RATE (SAR)

### THIS MODEL MEETS THE GOVERN-MENT'S REQUIREMENTS FOR EXPO-SURE TO RADIO WAVES

Your cellular phone is a radio transmitter and receiver. It is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (FCC, USA) and by Health Canada. These requirements include safety margins designed to assure the protection of all persons, regardless of age and health. They use a unit of measurement known as the Specific Absorption Rate (SAR). The SAR limit is 1.6 W/kg averaged over one gram of tissue.

The highest SAR value for this device when tested at the ear was 0.56 W/kg. In positions other than the head, such as on the body, a separation distance of 2 cm is required. The highest SAR value in this case was 0.98 W/kg.

Information about this device model can be found at

### http://www.fcc.gov/oet/fccid

by searching the equipment authorization system using **FCC ID**: PWX-C72.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

Additional Information can be found on the websites of the World Health Organization

### http://www.who.int/emf

the Cellular Telecommunications Industry Association (CTIA) web-site at

### www.phonefacts.net

the Canadian Wireless Telecommunications Association (CWTA) website www.cwta.ca

or Siemens

www.siemens.com/mobilephones

### The U.S. Food and Drug Administration's (FDA) Center for Devices and Radiological Health Consumer Update on Mobile Phones

right page (133) of C72 Cormorant FUG, 105x143, us-en, A31008-H6090-A40-1-4A19

FDA has been receiving inquiries about the safety of mobile phones, including cellular phones and PCS phones. The following summarizes what is know – and what remains unknown – about whether these products can pose a hazard to health, and what can be done to minimize any potential risk. This information may be used to respond to questions.

### Why the concern?

Mobile phones emit low levels of radio frequency energy (i.e., radio frequency radiation) in the microwave range while being used. They also emit very low levels of radio frequency energy (RF), considered nonsignificant, when in the stand-by mode. It is well known that high levels of RF can produce biological damage through heating effects (this is how your microwave oven is able to cook food). However, it is not known whether, to what extent, or through what mechanism, lower levels of RF

might cause adverse health effects as well. Although some research has been done to address these questions, no clear picture of the biological effects of this type of radiation has emerged to date. Thus, the available science does not allow us to conclude that mobile phones are absolutely safe, or that they are unsafe. However, the available scientific evidence does not demonstrate adverse health effects associated with the use of mobile phones.

### What kinds of phones are in question?

Questions have been raised about hand-held mobile phones, the kind that have a built-in antenna that is positioned close to the user's head during normal telephone conversation. These types of mobile phones are of concern because of the short distance between the phone's antenna – the primary source of the RF – and the person's head. The exposure to RF from mobile phones in which the antenna is located at greater distances from the user (on the outside of a car, for example) is drastically lower than that from hand-held phones, because a person's RF exposure decreases rapidly with distance from the source. The safety of so-called "cordless phones," which have a base unit connected to the telephone wiring in a house and which operate at far lower power levels and frequencies, has not been questioned.

How much evidence is there that handheld mobile phones might be harmful? Briefly, there is not enough evidence to know for sure, either way; however, research efforts are on-going. The existing scientific evidence is conflicting and many of the studies that have been done to date have suffered from flaws in their research methods. Animal experiments investigating the effects of RF exposures characteristic of mobile phones have yielded conflicting results. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. In one study, mice genetically altered to be predisposed to developing one type of cancer developed more than twice as many such cancers when they were exposed to RF energy compared to controls. There is much uncertainty among scientists about whether results obtained from animal studies apply to the use of mobile phones. First, it is uncertain how to apply the results obtained in rats and mice to humans. Second. many of the studies showed increased tumor development used animals that had already been treated with cancer-causing chemicals, and other studies exposed the animals to the RF virtually continuously - up to 22 hours per day.

For the past five years in the United States, the mobile phone industry has supported research into the safety of mobile phones. This research has resulted in two findings in particular that merit additional study:

1. In a hospital-based, case-control study, researchers looked for an association between mobile phone use and either glioma (a type of brain cancer) or acoustic neuroma (a benign tumor of the nerve sheath). No statistically significant association was found between mobile phone use and acoustic neuroma. There was also no association between mobile phone use and gliomas when all types of gliomas were considered together. It should be noted that the average length of mobile phone exposure in this study was less than three years.

When 20 types of glioma were considered separately, however, an association was found between mobile phone use and one rare type of glioma, neuroepithelliomatous tumors. It is possible with multiple comparisons of the same sample that this association occurred by chance. Moreover, the risk did not increase with how often the mobile phone was used, or the length of the calls. In fact, the risk actually decreased with cumulative hours of mobile phone use. Most cancer causing agents increase risk with increased exposure. An ongoing study of brain cancers by the National Cancer Institute is expected to bear on the accuracy and repeatability of these results.1

> © S

(U)

Researchers conducted a large battery of laboratory tests to assess the effects of exposure to mobile phone RF on genetic material. These included tests for several kinds of abnormalities, including mutations, chromosomal aberrations, DNA strand breaks, and structural changes in the genetic material of blood cells called lymphocytes. None of the tests showed any effect of the RF except for the micronucleus assay, which detects structural effects on the genetic material. The cells in this assay showed changes after exposure to simulated cell phone radiation, but only after 24 hours of exposure. It is possible that exposing the test cells to radiation for this long resulted in heating. Since this assay is known to be sensitive to heating, heat alone could have caused the abnormalities to occur. The data already in the literature on the response of the micronucleus assay to RF are conflicting. Thus follow-up research is necessary. 2

right page (135) of C72 Cormorant FUG, 105x143, us-en, A31008-H6090-A40-1-4A19

FDA is currently working with government, industry, and academic groups to ensure the proper follow-up to these industry-funded research findings. Collaboration with the Cellular Telecommunications Industry Association (CTIA) in particular is expected to lead to FDA providing research recommendations and sci-

entific oversight of new CTIA-funded research based on such recommendations.

Two other studies of interest have been reported recently in the literature:

- Two groups of 18 people were exposed to simulated mobile phone signals under laboratory conditions while they performed cognitive function tests. There were no changes in the subjects' ability to recall words, numbers, or pictures, or in their spatial memory, but they were able to make choices more quickly in one visual test when they were exposed to simulated mobile phone signals. This was the only change noted among more than 20 variables compared.<sup>3</sup>
- In a study of 209 brain tumor cases and 425 matched controls, there was no increased risk of brain tumors associated with mobile phone use. When tumors did exist in certain locations, however, they were more likely to be on the side of the head where the mobile phone was used. Because this occurred in only a small number of cases, the increased likelihood was too small to be statistically significant.4

In summary, we do not have enough information at this point to assure the public that there are, or are not, any low incident health problems

### U.S. FDA

associated with use of mobile phones. FDA continues to work with all parties, including other federal agencies and industry, to assure that research is undertaken to provide the necessary answers to the outstanding questions about the safety of mobile phones.

### What is known about cases of human cancer that have been reported in users of hand-held mobile phones?

Some people who have used mobile phones have been diagnosed with brain cancer. But it is important to understand that this type of cancer also occurs among people who have not used mobile phones. In fact, brain cancer occurs in the U.S. population at a rate of about 6 new cases per 100,000 people each year. At that rate, assuming 80 million users of mobile phones (a number increasing at a rate of about 1 million per month), about 4800 cases of brain cancer would be expected each year among those 80 million people, whether or not they used their phones. Thus it is not possible to tell whether any individual's cancer arose because of the phone, or whether it would have happened anyway. A key question is whether the risk of getting a particular form of cancer is greater among people who use mobile phones than among the rest of the population. One way to answer that question is to compare the usage of mobile phones among people with brain cancer

with the use of mobile phones among appropriately matched people without brain cancer. This is called a case-control study. The current case-control study of brain cancers by the National Cancer Institute, as well as the follow-up research to be sponsored by industry, will begin to generate this type of information.

### What is FDA's role concerning the safety of mobile phones?

Under the law, FDA does not review the safety of radiation emitting consumer products such as mobile phones before marketing, as it does with new drugs or medical devices. However, the agency has authority to take action if mobile phones are shown to emit radiation at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of mobile phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions at this time, FDA has urged the mobile phone industry to take a number of steps to assure public safety. The agency has recommended that the industry:

 Support needed research into possible biological effects of RF of the type emitted by mobile phones; Siemens AG 2004, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\am\_FDA.FM (U)

 Design mobile phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and

right page (137) of C72 Cormorant FUG, 105x143, us-en, A31008-H6090-A40-1-4A19

 Cooperate in providing mobile phone users with the best possible information on what is known about possible effects of mobile phone use on human health.

At the same time, FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of mobile phone safety to ensure a coordinated effort at the federal level. These agencies are:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Health and Safety Administration
- National Telecommunications and Information Administration

The National Institutes of Health also participates in this group.

In the absence of conclusive information about any possible risk, what can concerned individuals do?

If there is a risk from these products – and at this point we do not know that there is – it is probably very small. But if people are concerned about avoiding even potential risks,

there are simple steps they can take to do so. For example, time is a key factor in how much exposure a person receives. Those persons who spend long periods of time on their hand-held mobile phones could consider holding lengthy conversations on conventional phones and reserving the hand-held models for shorter conversations or for situations when other types of phones are not available.

People who must conduct extended conversations in their cars every day could switch to a type of mobile phone that places more distance between their bodies and the source of the RF, since the exposure level drops off dramatically with distance. For example, they could switch to:

- a mobile phone in which the antenna is located outside the vehicle,
- a hand-held phone with a built-in antenna connected to a different antenna mounted on the outside of the car or built into a separate package, or
- a headset with a remote antenna to a mobile phone carried at the waist.

(U)

right page (139) of C72 Cormorant FUG, 105x143, us-en, A31008-H6090-A40-1-4A19

Your phone may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, please contact your local service facility.

This device complies with part 15 of the FCC rules. Operation is subject to the condition that this device does not cause harmful interference. Template: X75, Version 2.2; VAR Language: am; VAR issue date: 050718

### Intellectual Property

### Intellectual Property Restrictions

All Intellectual Property, as defined below, which is owned by or otherwise the property of Siemens Information and Communications Mobile, LLC ("Siemens"), its affiliates, partners or suppliers, relating to the Phone, including but not limited to accessories, parts or software relating thereto (the "Phone System"), is proprietary under federal laws, state laws and International treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship. You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) disassemble, decompile, reverse engineer, prepare derivative works from, modify or make any other effort to create source code from the software. No title to ownership in the Intellectual Property is transferred to you through purchase or possession of the Phone or its components. All applicable rights of the Intellectual Property shall remain with Siemens, its affiliates, partners or suppliers.

Siemens will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or parts furnished hereunder with software, apparatus or devices not furnished by Siemens, nor will Siemens have any liability for the use of ancillary equipment or software not furnished by Siemens which is attached to or used in connection with the Product, The foregoing states the entire liability of Siemens with respect to infringement of patents by the Product or any parts thereof.

Laws in the United States and other countries preserve for Siemens certain exclusive rights for copyrighted Siemens software, such as the exclusive rights to reproduce and distribute copies of such Siemens software. Siemens software may be used only in the Product in which the software was originally embodied when purchased, and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such Siemens software or exercise of rights in such Siemens software is permitted. No license is granted by implication, estoppel or otherwise under Siemens patent rights or copyrights.

AI

### Ten Driving Safety Tips

Your Siemens wireless phone gives you the power to communicate by voice – almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

### Get to know your phone and its features such as speed dial and redial.

Carefully read your instruction manual and learn to take advantage of valuable features most phones offer including, automatic redial and memory dial – most phones can store up to 99 numbers in memory dial. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

### When available, use a hands-free device.

A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your phone or a speaker phone accessory, take advantage of these devices if they are available to you.

### Position your phone within easy reach.

Make sure you place your wireless phone within easy reach and where you can grab it without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voicemail answer it for you.

### Suspend conversations during hazardous driving conditions or situations.

Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

### Do not take notes or look up phone numbers while driving.

If you are reading an address book or business card while driving a car, or writing a "to do" list, then you are not watching where you are going. It's common sense. Don't get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

### 142 Ten Driving Safety Tips

### Dial sensibly and assess the traffic.

If possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip, or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip – dial only a few numbers, check the road and your mirrors, then continue.

### Do not engage in stressful or emotional conversations that may be distracting.

Stressful or emotional conversations and driving do not mix – they are distracting and even dangerous when you are behind the wheel. Make people you are talking with aware you are driving and if necessary, suspend phone conversations that have the potential to divert your attention from the road.

### Use your phone to call for help.

Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations – with your phone at your side, help is only three numbers away. Dial 9-1-1 in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it is a free call on your wireless phone.

### Use your phone to help others in emergencies.

Your wireless phone provides you a perfect opportunity to be a "good Samaritan" in your community. If you see an auto accident, crime in progress or other serious emergencies where lives are in danger, call 9-1-1, as you would want others to do for you.

### Call roadside assistance or a special wireless non-emergency assistance number when necessary.

Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call to 9-1-1. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless numbers.

"The wireless industry reminds you to use your phone safely when driving."

### End user license agreement

This Software License Agreement ("Agreement") is between You and Siemens Information and Communication Mobile. LLC and/or one of its affiliates ("Licensor"). The Agreement authorizes You to use the Software specified in Clause 1 below. which may be included on Your phone, stored on a CD-ROM, sent to You by electronic mail, downloaded from Licensor's Web pages or servers or from other sources under the terms and conditions set forth below. This is an agreement on end user rights and not an agreement for sale. Licensor continues to own the copy of the Software and any other copy that You are authorized to make pursuant to this Agreement. Read this Agreement carefully before installing, downloading or using the Software. Further, by installing, downloading and/or using the Software, You agree to the terms and conditions of this Agreement.

### 1. Software.

As used in this Agreement, the term "Software" means, collectively: (i) all the software in Your phone, all of the contents of the disk(s), CD-ROM(s), electronic mail and its file attachments, or other media with which this Agreement is provided; (ii) related Licensor or third party software; (iii) digital images, stock photographs, clip art or other artistic works ("Stock Files") (iv) related

explanatory written materials ("Documentation"); (v) fonts (vi) upgrades, modified versions, updates, additions and copies of the Software, if any, licensed to You by Licensor (collectively "Updates") and (vii) any other possible documentation related thereto.

### 2. End user rights and use.

Licensor grants to You a non-exclusive, non-transferable end user right to install the Software or use the Software installed on the phone. The Software is licensed with the phone as a single integrated product and may be used with the phone only as set forth in these licensing terms.

### Limitations on end user rights.

- (a) You may not copy, distribute, or make derivative works of the Software.
- (b) You may not use, modify, translate, reproduce or transfer the right to use the Software or copy the Software except as expressly provided in this Agreement.
- (c) You may not resell, sublicense, rent, lease or lend the Software; except You may permanently transfer all of Your rights as set forth in the Agreement only as part of a permanent sale or transfer of the phone, provided the recipient agrees to the terms of this Agreement.

(0)

### 144 End user license agreement

- (d) You may not reverse engineer, reverse compile, disassemble or otherwise attempt to discover the source code of the Software (except to the extent that this restriction is expressly prohibited by law) or create derivative works based on the Software.
- (e) You shall not display, modify, reproduce or distribute any of the Stock Files included with the Software.
- (f) You shall not display, modify, reproduce or distribute any of the pre-loaded content included with the software unless permitted as stated in the User Guide or in the prompts in the Software. In the event that You are allowed to display, modify, reproduce or distribute certain parts of the pre-loaded content, You shall review the "Readme" files associated with the pre-loaded content (contained on the CD) to ascertain what rights You have with respect to such materials. Pre-loaded content may not be used in the production of libelous, defamatory, fraudulent, infringing, lewd, obscene or pornographic material or in any otherwise illegal manner. You agree that You shall only use the preloaded content in a manner that complies with all applicable laws, including, but not limited to, applicable restrictions concerning copyright and other intellectual property

- rights. You may not register or claim any rights in the pre-loaded content or derivative works thereof.
- (g) You agree that You shall only use the Software in a manner that complies with all applicable laws in the jurisdiction in which You use the Software, including, but not limited to, applicable restrictions concerning copyright and other intellectual property rights.

### 4. Copyright.

Licensor and/or its software suppliers and their respective affiliates own the Software and all rights, including without limitation including proprietary rights therein, are protected by international treaty provisions and other applicable national laws of the country in which it is being used. The structure, organization and code of the Software are the valuable trade secrets and confidential information.

### 5. Multiple copies/updates.

If the Software supports multiple platforms or languages, if You receive the Software on multiple media, of if You otherwise receive multiple copies of the Software, the number of phones on which all versions of the Software are installed shall be one phone. If the Software is an Update to a previous version of the Software, You must possess a valid end user right to such previous version in order to use the Update and You may use the previous ver-

Template: X75, Version 2.2; VAR Language: am; VAR issue date: 050718

sion for ninety (90) days after You receive the Update in order to assist You in the transition to the Update. After such time You no longer have a right to use the previous version, except for the sole purpose of enabling You to install the Update.

### Commencement & termination.

This Agreement is effective from the first date You use or install the Software. Your end user rights automatically and immediately terminate without notice from Licensor if You fail to comply with any provision of this Agreement. In such event, You must immediately delete, destroy or return at Your own cost and expense, and without entitlement to any refund of the purchase price, the phone and the Software, and all related material to Licensor.

7. Except as expressly provided in the limited warranty for the phone, you acknowledge the Software is provided "as is" without warranty of any kind express or implied. To the maximum extent permitted by applicable law neither Licensor, Licensor's Software suppliers or their respective affiliates, nor the copyright holders make any representations or warranties, express or implied, including but not limited to the warranties of merchantability or fitness for a particular purpose or that the Software will not infringe any third party patents, copyrights, trademarks or other rights. There is no warranty by

Licensor or by any other party that the functions contained in the Software will meet your requirements or that the operation of the Software will be uninterrupted or error free.

8. Not fault tolerant. The Software may contain technoloy that is not fault tolerant and is not designed, manufactured, or intended for use in environments or applications in which the failure of the licensed Software could lead directly to death, personal injury, or severe physical or environmental damage or financial loss.

## 9. Limitation of liability.

To the maximum extent permitted by applicable law, in no event shall Licensor or Licensor's Software suppliers or their respecitive affiliates and employees be liable for any lost profits, revenue, sales, data or costs of procurement of substitute goods or services, property damage, personal injury, interruption of business, loss of business information or for any special, direct, indirect, incidental, economic, cover, punitive, special or consequential damages, however caused and whether arising under contract, tort, negligence, or other theory of liability arising out of the use of or inability to use the Software, even if Licensor or its Software suppliers are advised of the possibility of such damages. Because some countries/states/jurisdictions do not allow the exclusion or limitation of

Siemens AG 2004, E:\Auftrag\Siemens\MobilePhones\FCCs\c72\FUG\am\_EndUserLic.fm

liability, but may allow liability to be limited, in such cases, the liability of Licensor, its Software suppliers and their respective affiliates and employees shall be limited to, at Licensor's option, either (a) return of the price paid less a reasonable amount for usage, or (b) repair or replacment of the Software that does not meet the limited warranty provided with the phone and which is returned in accordance with the requirements of the limited warranty.

Nothing contained in this Agreement shall prejudice the statutory rights of any party dealing as a consumer. Nothing contained in this Agreement limits Licensor's liability to You in the event of death or personal injury resulting from Licensor's negligence if law prohibits such a limitation. Licensor is acting on behalf of its software suppliers and their respective employees and affiliates for the purpose of disclaiming, excluding and/or restricting obligations, warranties and liability as provided in this clause 9, but in no other respects and for no other purpose.

### 10. Technical support.

Licensor has no obligation to furnish You with technical support except as agreed in writing between You and Licensor in the Limited Warranty provided with the phone.

### 11. Export control.

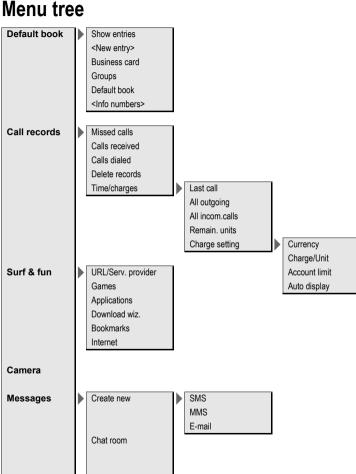

The Software may be subject to export regulations of the United States and other countries. You agree that You shall comply with all applicable export laws, restrictions and regulations of the United States or foreign agencies or authorities, and shall not export, or transfer for the purpose of re-export, any Software, product or technical data received under this Agreement or any Software or product produced by use of such technical data, including processes and services, in violation of any applicable restrictions, laws or regulations, or without all necessary approvals.

### 12. Applicable law & general provisions.

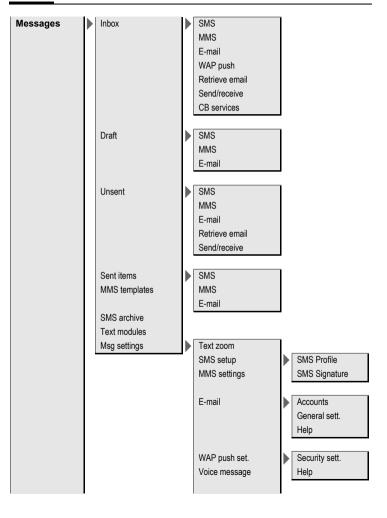

This Agreement shall be governed by and construed in accordance with the laws of the State of California without regard to its conflicts of laws rules. This is the entire agreement between Licensor and You relating to the Software and it supersedes any prior representations, discussions, undertakings, end user agreements, communications or advertising relating to the Software.
