

Bullshit Detector™ Operations Guide - 19 weeks on the best seller list!

Use common sense when using the BSD - **Serious Stuff** (read this part!) 

The BSD or Bullshit Device, was created to provide fun and entertainment for an adult audience. There are times when use of the BSD IS NOT appropriate.

Do not use the BSD around children. **Safety** - the BSD is intended for adults only (over 17 years of age) - do not allow children to play with it. The remote is small enough that it presents a choking hazard. **Content** - children are very impressionable and the BSD is intended for the entertainment of adults only - make sure that children are not within earshot when using the BSD.

Do not use the BSD in Church or in other places of worship. While you might think it is funny, it will more than likely deeply offend people that are religious. Using the BSD in these situations shows disrespect and is in poor taste - so don't do it.

Do not use this product when others are under duress. Funerals, hospital visits or other times in which people face stress are not appropriate times to use the BSD.

Do not use the BSD at public functions. Only use the BSD at gatherings at which you are sure that no one present will take offense.

HOW TO USE YOUR BULLSHIT DETECTOR™ - FUN STUFF!

Our 100% accredited BS Engineers have designed this unit to be as easy, sophisticated device of expression. You should be able to master the complex functions within a few years.

Your BSD contains nine (9) specially developed phrases, containing choice words and sounds. Based on our own surveys and market research, we feel that that these phrases offer the best chance of retaliating against BS Artists, or anyone mentioned on the front of the packaging. Whenever you turn your BSD "on" or bring it out of *Sleep Mode* (see below) the unit is ready to play the first phrase. The unit automatically scrolls forward through the nine phrases, and then "wraps around" from the ninth (9th) phrase to the first (1st). Your unit can play the same phrase over and over again, or go scroll backwards through the phrases, providing the ultimate flexibility in setting your prankster environment. Below are "excerpts" from the phrases, listed in order. Use these to provide a point of reference as you scroll forward and backward through the phrase list.

These are the selections, in order:

1. There's a Bullshitter in here...
2. Talking out your ass ...
3. Barbershop Bull Quartet ...
4. Bullshit getting deep ...
5. Severe Bullshit Warning
6. Bullshit Deflectors...
7. Whooo Mercy! Did Somebody...
8. Blowin' Smoke ...
9. Bullshit Rap ...

Eyes blink when activated
On/Off
Volume

HOW TO USE THE BASE UNIT:

On/Off Switch → The On/Off switch is located in the lower right hand corner of the BSD. You can tell your BSD is ready to use when the bull's eyes **flash** every ten seconds. If the eyes are not flashing, the BSD is in *Sleep Mode*. *Sleep Mode* will occur when your BSD hasn't been used for over an hour or more; it is a design feature that extends battery life.

Just remember: "If it ain't flash'n" it ain't trash'n"

Note: To exit *Sleep Mode*, simply turn the BSD Off and then ON again. This will also reset the phrase selector to the first phrase.

Volume control → The BSD was designed to be very embarrassing, and is quite loud! Please make sure that the volume is set "appropriately" for the environment, and the people you wish to embarrass.

HOW TO USE THE REMOTE:

STOP

If the BSD is playing and you need to stop it at any time, simply Press the STOP button. This will stop the message, and advance the BSD to the next phrase, ready for play.

Bull

To **ACTIVATE** your BSD, press the BULL button. This will cause your unit to play one of the nine (9) special BS messages for your intended bullshitting victim. This button will also advance the BSD to the next phrase.

Aww man!
Do it again!

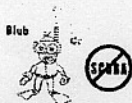

BACKWARDS

In addition to automatically scrolling **FORWARD** through the phrases, your BSD can go **BACKWARDS**. Here's how: The unit **must not be playing**, and **must not be in Sleep Mode**.

Press the **STOP** button -- this will scroll back one phrase. If the BSD is on the first phrase, it will "wrap around" to the last phrase (9th). To replay the same phrase that was just heard, press **STOP** while the unit is waiting! Pressing it twice goes back two phrases, etc. **Don't forget which phrase you left off on!**

CARE OF YOUR BULLSHIT DETECTOR™

Care of your BSD requires **Common Sense** -- if you don't have any, find someone like a friend, a relative, or someone else brighter than you. Hey, your shoes are untied!

- **CLEANING:** ONLY CLEAN the EXTERIOR (the case) of the BSD. Use a slightly water dampened cloth and lightly wipe the exterior surfaces. **DO NOT USE** solvents, harsh soaps or abrasive cleaners - these will damage the finish of your BSD. Save the Comet and wire brush for your CD collection.
- **IMMERSION:** DO NOT IMMERSE the BSD in liquids or allow any material, liquid or otherwise, into the speaker grill area. And yes, this means no scuba diving or water slides! Do not attempt to **BOIL** your BSD as it does not taste good.
- **EATING:** DO NOT EAT your BSD - for the same reason as above, but if you have to think about this one, then it may be too late. If you see anyone trying to ingest the BSD, please stop them immediately and contact Poison control or the nearest Psychiatric Ward.
- **DESTRUCTION:** DO NOT DROP, Smash, Crush, Pulverize, Spindle, Mix, Frappe, Blend, Pulpate, Bend, Torque, Cut, Jounce, Levigate, Press or Mash your BSD as this will be deleterious to its functioning - do we really need to tell you this?
- **BATTERIES:** Once again, our BS Engineers figured out a way to get rid of the nasty car battery that once powered the early models. This version only needs 4 AAA batteries (not included), and the remote required a special 6V battery (included).
*** NOTE: Battery-power will affect the range of your BSD as well as the loudness and clarity - only use fresh alkaline batteries and not the ones from your VCR remote.***

Bullshit Detector™ Product Safety Information

The Bullshit Detector™ was created for the entertainment of legal adults. It is for novelty use only and is not intended to anger, incite or otherwise bring about malicious action on the part of its users or their prospective targets. World² Toys is in no way, legal or otherwise, responsible for the actions taken by or damage incurred by the users of this product.

Parental WARNING! **Explicit Content**

This product contains explicit language and content. It is intended for use by legal adults only. Children, or individuals under the age of 18 should not be within earshot when this product is employed.

WARNING: SOUND HAZARD

DO NOT PLACE NEAR EAR.

This device emits sound pressure levels of 115 DB and can cause permanent hearing loss.

The Bullshit Detector™ was designed to be extremely loud and the user should never place the Base Unit near his or her ear prior to activation. Permanent hearing loss can result if this product is used in a confined area.

WARNING: CHOKING HAZARD

Small Parts. Not intended for children under 3 years of age.

The remote control for the Bullshit Detector™ is small enough that it can be ingested by children. Batteries, screws and other small parts such as access doors can also be swallowed. **NEVER ALLOW** children to play with, or handle the Remote Control or any Small Parts that comprise the Bullshit Detector™

"Note: The Manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment."

Questions, comments, and additional safety concerns about the Bullshit Detector™ should be directed to World² Toys; find us on the WEB at www.bullshitdetector.com
