

Operational Description

FlashDio™ support both IBM PC/AT compatible computers and Apple computers;
OS Windows 98/98SE, 2000, ME, and XP; Mac OS 8.6 or higher and Linux 2.4.x and above.

HOW TO PLUG AND PLAY

NOTE:

1. If your computer operates under OS Windows 98/98SE, or Mac OS 8.6, please read "Installation instructions for Device Driver" first, before using FlashDio™.
2. You must first turn on the computer before connecting FlashDio™ to your computer.
WARNING: Do not force the USB connector of FlashDio™ into the USB port.
Please take gentle care when plugging and unplugging all connectors.

INSTALLATION:

FOR WINDOWS 2000/ME/XP AND MAC OS 9.0 AND ABOVE

FlashDio™ does not require driver installation for OS Windows 2000/ ME/ XP,
and Mac OS 9.0 and above.

Just plug FlashDio™ to the USB port of your computer and 'Windows 2000/ME/XP and
Mac OS 9.0 and above' will automatically install the software from its own operating system.

Operating Systems

: Mac OS 9 & 8.6 or later (with USB support), Windows XP, Windows 2000,
Windows 98/98SE, Windows ME. Do not need device driver for Mac OS 9.0
or later & Windows ME or Later.

USB connector: Plugs into either a hub or port on the computer.
