Attestation

We, Netgear Incorporated, attest the followings for our device FCC ID: PY322100558.

a. This device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.

b. This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.

c. The transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

We also acknowledging the device restriction as below:

a. Prohibited for control of or communications with unmanned aircraft systems, including drones.
