Hi Mike,

Pls see my answer as belows.

Notice_content

Question #1: Please provide additional internal photos by removing metal plate on the RF board.

<answer>pls see revised internal photos as attached.

Question #2: As indicated in the test setup photos, the EUT was tested without the enclosure. Is this device seeking module approval ? If so, please justify module approval by providing the cover letter to request module approval and address all criteria for module approval.

<answer>The EUT is not seeking modular approval. The enclosure is plastic therefore it does not affect the EMC performance.

Thanks,

Claire
