RE: FCC ID: PY3WGR615V\_ATCB002043

Attention: Lily Chang

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that in the first internal photo there is what appears to be copper tape connecting two sections. This appears to be a modification. However, nothing in the report or other documentation mentions modifying the EUT during testing. Please verify if this is an existing condition or if this was done during compliance testing. If this was done during compliance testing, please provide an attestation from the manufacturer that this modification will be implemented in the final product.
2. FYI - Please note that while your report states that you used ANSI C63.4 2003, the plots for peak readings are not in accordance to the standard specified. Please note that ANSI C63.4 states that above 1GHz for peak measurements the video bandwidth is to be at least 3 times the resolution BW.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
