## PY7-83376C Data Reuse Justification and Summary

To Whom It May Concern:

We are applying data reuse for FCC ID: PY7-83376C (variant) based on the parent model FCC ID: PY7-12907W (Parent).

Regarding WLAN/Bluetooth/WPT/NFC, both models share the same PCB layout, antennas, and components. The unlicensed band data for the parent model remains representative for the variant model (equipment classes DSS, DTS, NII, DCD and DXX) and test reports for the parent model plus test reports with the spot check data for the variant model have been submitted. The power to be listed on the F-731 and FCC grants for these bands are the values detailed in the parent reports as the spot check data shows all values within expected tolerances of the parent model.

For SAR, WLAN, Bluetooth and NFC SAR data and WPT RF Exposure data are referenced from the parent model FCC ID: PY7-12907W and are leveraged to cover the variant FCC ID: PY7-83376C. SAR the data reuse test plan was approved via manufacturer KDB inquiry. The variant model SAR report has full tested data for the licensed bands.

	Indicates full set of test data. Values in this report to be listed on the grant for these bands.					
	Partial test data used to confirm that the parent model data is representative for the variant model. Data for these bands is for reference only
