Re: Request to change the FCC ID for an application filed under FCCID:PZLMC9665CG2

Gentlemen:

Submitted herewith is a request to change the referenced FCC ID to FCCID:PZLM9665. This modification reflects a change in the marketing strategy by EADS. A revised FCC ID label has been submitted to the file. EADS also requested a revision in the Manual wording regarding RF exposure. EADS wishes to have the separation distance calculated without the 50% averaging interval normally associated with this equipment. A revised calculation and manual statement have been submitted to the file. All other file material continues to apply to the subject equipment.

If there are any questions please contact me at the address above or via telephone at 410 531 3439 or email at jinglis@erols.com.

Sincerely,

Phillip Inglis
Consultant
