## 1.4 Purpose of the document

User manual of the Carkit CAN.

## 2 Bluetooth

*Bluetooth enables a wireless connection between a mobile phone and the handsfree telephone system.*

The mobile phone<sup>1</sup> must be linked with the handsfree kit (only has to be done once). To establish this link, you must carry out various steps, depending on the mobile phone you are using. Please refer to the instructions for your mobile phone. In principle, you must carry out the following steps to establish the link between the mobile phone and the handsfree system:

- Switch on the ignition
- Make sure, that your mobile phone is switched on and enter the correct PIN
- Enable Bluetooth on your phone
- Search for Bluetooth compatible devices (=> user manual of your mobile phone)
- Connect the mobile phone to the handsfree kit it finds. The name of the handsfree kit depends on the type/variant<sup>2</sup> installed in your vehicle.
- Enter the Bluetooth passkey for handsfree kit within 30 seconds. The passkey is **1234**.
- Wait until your mobile phone indicates that it has been successfully linked. If the two devices failed to link, please repeat the procedure.
- Once you have completed this procedure, the handsfree kit will next time automatically connect to your mobile phone when you switch on the ignition of the vehicle and if your mobile phone is ready for operation.

You can link up to four mobile phones to the mobile phone adapter. However, it is only possible to activate one connection at a time. If you link a fifth mobile phone to the handsfree kit, the link to the mobile phone, which has not been used together with the handsfree kit for the longest time will be cancelled.

## 3 Speech control

The speech control is activated by pressing the PTT button. Following commands are available:

- Enter pin
- Dial number => zero, one, two ... nine
- Redial
- Select name
- Store name
- Delete name
- Play phone book
- Delete phone book
- Dial

<sup>1</sup> The mobile phone must support the handsfree profile 1.0.

<sup>2</sup> please refer to the vehicle user manual

Temic reserves the copyright to this document. It must not be copied, communicated or made available to third parties without the written authorisation of Temic

- Store
- Cancel
- Repeat
- Back
- Delete

The handling of the handsfree kit is dependent on the type/ variant installed in your vehicle. So please refer to the vehicle user manual.

## 4 FCC statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
