

Date: 12 June 2019

Innovation, Science and Economic Development Canada (ISED)

Subject: C2PC for IC ID: 4596A- MERCURY6EM &  
C2PC for FCC ID: Q2GMERCURY6EM

To whom is may concern:

The purpose of this C2PC change request is to modify the Xplore Technologies certification, IC ID: 4696A-Mercury6EM and FCC ID: Q2GMERCURY6EM (Single Modular), which was originally certified for mobile RF exposure conditions, to use in a portable RF exposure configuration in a Xplore Technologies Host, which is more completely described in this application. To evidence compliance with ISED requirements utilizing the requested portable configuration, a SAR test has been performed and is being provided with this application.

A SAR configuration evaluated in the Xplore Technologies, Model iX101L1 and iX101L2, was for simultaneous transmission of the Xplore Technologies Corp., Model M6E-MICRO RFID module.

Sincerely yours,
