RE: Carematrix, Inc.

FCC ID: Q35-MP-1200-AA

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The photograph exhibits show 2 models, with a different FCC ID shown on each model. It is assumed that this application is being submitted to cover both models. Please correct the FCC ID's shown in the external/internal photographs exhibits to remove the FCC ID that is not applicable.
- 2) For clarification purposes, please provide an explanation within the operational description that both models utilize the same TX modules or boards.
- 3) Please explain the derivation of the limits shown in Appendix A, Section 3.0 of the test reports. The limit for this device would normally be $50 \text{ mV/m} = 50000 \text{ uV/m} = 94 \text{ dBuV/m}$, not 98.98 dBuV/m . Note that 94 dBuV/m was used on the test plots.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
