November 7, 2012

FCC ID: Q3E-XTP-R1G1

To Whom It May Concern:

The model XTP device, with the FCC product code Q3E-XTP-R1G1, has an ISO 14443A standard based RFID radio used for reading proprietary RFID and standard RFID media. The device communicates at 13.56MHz per the ISO 14443A standard. The device is classified as industrial infrastructure equipment and will only be installed by qualified installation personnel.

The type of equipment approval is original certification covered by CFR47 part 15.225 rules.

Sincerely,

Bert Buxton
