

Dear Sir:

Please have my reply as below.

Reply Q1 ~ Q3: Revised and please refer to revised user manual.

Reply Q4: When SAR testing at body-worm position, we varified two condiitons (front pannel toward the phantom,and back toward the phantom)

Reply Q5 & Q7: Please have the revised file for SAR plots, it included the sar valuefor WIFI.

Reply Q6: Refer to the attachment file (PWG-500 Appendix 1) show the WiFi and GSM signal strength mean both are active. For example the unit receive a GSM call and establish a call or on conversation then the VoIP incoming call via WiFi will indicate by the vibration.

Besides, we have uploaded two SAR test plots, please refer to the last one with the file name of "PWG-500 SAR TestRpt Test Plot-1 Revised 0314-1" & "PWG-500 SAR TestRpt Test Plot-1 Revised 0314-2" and delete the one of 0314.

Best Regards,

Amanda Wu
