

Fiber-Span Tune Up Information

31-Jan-07

Re: Fiber-Span tune up information statement

Fiber-Span has designed the submitted fiber optic repeater equipment such that there is no requirement for tune up. RF performance is maintained automatically over optical link losses which are accomplished using Fiber-Span proprietary Optical RF Link technology. Tuning of any type must only be done by Fiber-Span or by a Fiber-Span authorized agent.

Sincerely,

Fiber-Span
