RE: Microvision, Inc.

FCC ID: Q4YHS2141

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The Internal photographs appears to contain 2 photographs that are identical, while only one side of the device is shown. Was this intentional, or were photographs for the second side of the device meant to be included? Note that it appears that the original application may have included 2 models, although the difference is between the models is uncertain. Please explain.
- 2) The 731 form states a frequency range of 2408-2480, while the original device was granted as 2402 - 2480. Please confirm the correct frequency range.
- 3) The modular request letter provided lists a higher output power than originally granted. Please explain.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson".

Timothy R. Johnson
Examining Engineer
