

## Technical Description

- |                     |                                                                                        |
|---------------------|----------------------------------------------------------------------------------------|
| ► Description       | In-door Repeater<br>Expand the coverage, especially for inside buildings and basement. |
| ► Type              | Full Duplex Type                                                                       |
| ► Frequency Range   | Down Link : 806MHz ~ 821MHz<br>Up Load : 851MHz ~ 869MHz                               |
| ► Max. Output Power | +27dBm $\pm$ 0.5dB (Nominal 0.5W)                                                      |
| Max. Input Power    | -40dBm                                                                                 |
| ► AGC               | 30dB                                                                                   |
| MGC                 | 20dB                                                                                   |
| ► Power Supply      | 110V, 60Hz (US Only)                                                                   |
