| <p><b>Conducted Emission<br/>Test Setup</b></p>               |  A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden table. A red cable connects it to a power supply unit on the floor. To the right, another wooden table holds a small electronic device and a power source. The setup is in a laboratory environment with a grey wall and a power outlet visible. |
| <p><b>Radiation Emission Test<br/>Setup (Below 30MHz)</b></p> |  A photograph showing a radiation emission test setup. A small electronic device is placed on a white, rectangular, shielded enclosure. The enclosure is surrounded by a metal frame. The background consists of a wall covered in white, square-shaped electromagnetic shielding tiles. The floor is dark and has yellow and black safety markings.                                                             |

**Radiation Emission Test  
Setup (30MHz to 1GHz)**

**Radiation Emission Test  
Setup (1GHz to 18GHz)**

**Radiation Emission Test  
Setup (Above 18GHz)**
