Dear Sir or Madam:

The RF chip installed in our product Intelligent key management system (model name: K26 FCC ID: Q65-K26), only 2.4G WIFI (802.11b and 802.11g/n, Frequency range: 2412-2462MHz) function and NFC (frequency: 13.56MHz) were activated, the other functions are disabled by using the software and the end user cannot activate them. Please contact me if there is need for any additional clarification or information.

Best Regards,
Sincerely Yours,

Signature:
