6731 Whittier Ave, McLean, VA 22101

March 9, 2005

RE: ICP Das Co., LTD.

FCC ID: Q6M3SDSST-24M

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please provide a detailed Block Diagram of the RF module/ RF section.
- 2.) The upper frequency listed on Form 731 is specified as 2441.216MHz. This does not match the Test Report. Please confirm the correct frequency range and modify the Form 731 if needed.
- 3.) If this module is intended to be used inside a notebook computer or any device which draws power from AC mains, then AC Conducted emissions testing must be performed. Otherwise the Grant will limit operations of this Module to battery operated systems only. Please advise.

William H. Graff  
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
