**Overall Assessment Letter for ZTE A261
FCC id: Q78-A261**

I have reviewed this application and find it compliant. This is an application for a modified variant of the Q78-A261FM mobile phone supporting GSM/GPRS. The phone supports 850 MHz and 1900 MHz frequency range in both GSM and GPRS modes.

The client declared that the only change to the A261 was the removal of the FM function. Only the worst case SAR configurations were re-tested and found to be lower than the measurements obtained for the Q78-A261FM. The highest head SAR was 0.63 W/kg for PCS 1900 at a frequency of 1909.8. The highest body SAR was 0.526 W/kg for PCS 1900 at a frequency of 1909.8.

Yours sincerely
