Subject: Supersede of Test Report Exhibit: “Q78-CBTSI28C Test Report” for ZTE Corp.: FCC ID: Q78-CBTSI28C

To Whom It May Concern:

On behalf of ZTE Corp., Bay Area Compliance Laboratories Corp. would like to request supersede of the test report exhibit (“**Q78-CBTSI28C Test Report**”) previously submitted for FCC ID: **Q78-CBTSI28C**. The reason for this supersede is that the test report previously uploaded to the FCC was an incorrect configuration of the device. The customer intended for this device to be the 60 W output power configuration but instead inadvertently certified the 47.75 W configuration. The output power of the device is controlled via firmware at the point of manufacture and in all other respects (electrical design specifications etc.) the device is identical to that which was previously certified. The revised test report exhibit (“**Q78-CBTSI28C Test Report rev. 1**”) features all revised testing subsequent to the correction of the device output power. Upon acceptance of supersede BACL will correct and reissue the corresponding FCC Grant.

Please also see ZTE Authorization Correction letter submitted along with this cover letter and revised test report.

If there are any questions or concerns in this matter please feel free to contact us, thank you.

Best Regards,

Douglas Méndez
