Overall Assessment Letter for ZTE Vodafone 1231

FCC id: Q78-VDF1231

I have reviewed this application and find it compliant. This is an application for a mobile phone supporting PCS 1900 and Bluetooth. Since the mobile phone also has a USB port for connection to Computers a filing for a Class B Computer peripheral has also been made. The phone additionally supports GSM 900 and DCS 1800, however are not relevant as it is not supported in North America.

Please note the following:

1: Spread Spectrum Declarations

The various declarations to meet the Spread Spectrum requirements are included as an Operating Description exhibit.

2: SAR

The product supports simultaneous transmission. The test report was reviewed in accordance with KDB 648474 D01 SAR Handsets Multi Xmitter and Ant, v01r05. Simultaneous transmission SAR was not required to be tested and approved.

I underwent the FCC RF exposure training with the FCC in October 2008.

As a result of the assessment review updated application form, SAR exhibit and EMC test report was received.

Yours sincerely

Vina Kerai
