**Overall Assessment Letter for ZTE A711G
FCC id: Q78-ZTEA711G**

I have reviewed this application and find it compliant. This is an application for a mobile phone supporting GSM/GPRS. The phone supports 850 MHz and 1900 MHz frequency range in both GSM and GPRS modes. The phone additionally supports GSM 900/DCS 1800; however is not a relevant band as it is not supported in North America.

The user manual has been updated to include the updated SAR levels, which are consistent with the SAR reports. Please note this product, ZTE Model: A711G is a variant of previously authorized, ZTE Model: V227 with FCC ID: Q78-ZTEV227. The A711G has an added GPRS functionality and therefore a new application is being made under FCC ID: Q78-ZTEA711G. A product equality declaration is provided within the submission which provides additional information. The original EMC and SAR test report covering GSM functionality (under FCC ID: Q78-ZTEV227) are being supplied. Therefore, two sets of SAR and EMC reports are being submitted due to GPRS assessment being covered in a separate report from the GSM assessment.

Yours sincerely
