**Overall Assessment Letter for ZTE C350**  
**FCC id: Q78-ZTEC350**

I have reviewed this composite application and find it compliant.

This is an application for handset which supports CDMA 1X at the 800 MHz frequency.

Please note the following:

1: SAR

Head SAR assessment was performed in the standard configurations on three channels. A headset was used for Body SAR assessment on mid channel in Face away from Body and Face towards the Body configuration.

The highest reported SAR values were:

Head: CDMA 800 (middle channel) Mode - Right Cheek touch - 1.15 W/kg;  
Body: CDMA 800 (middle channel) Mode - Back towards Body – 0.284 W/kg (15mm spacing)

Yours sincerely

Vina Kerai  
Compliance Engineer, BABT
