Subject: RE: Responds Q78-ZTEMF626

Dear All

Please see my answers below and give your advice.

i°

12/12/2008

1) This is a category 8 HSDPA data device operating under 3GPP Release5; only WCDMA and HSDPA (H-set 1 sub-test 1, MPR=0, which is the worst case) are addressed in maximum output power table. MPR is special considered for HSUPA device.

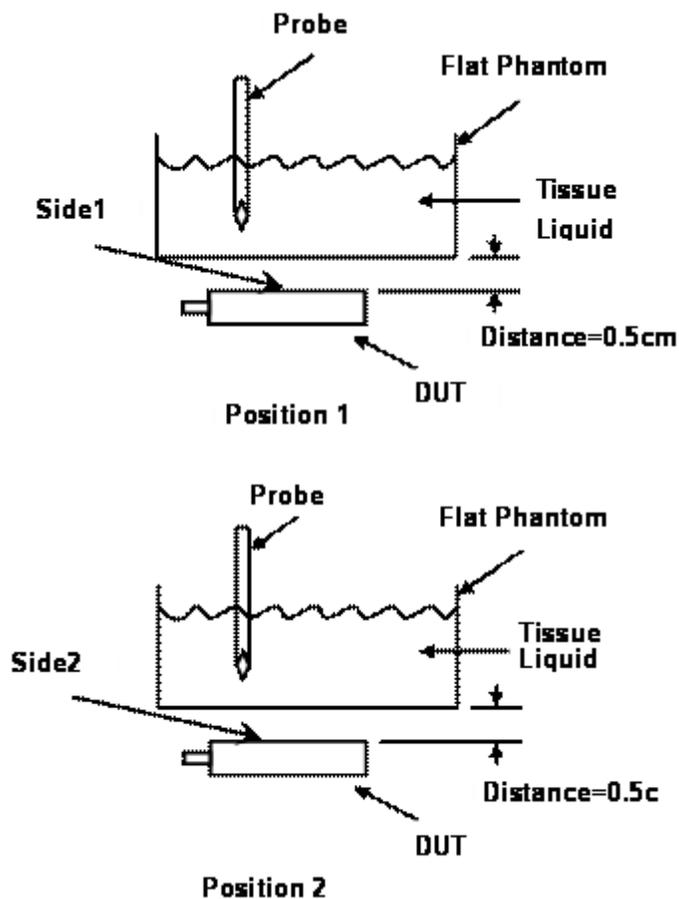

Action:

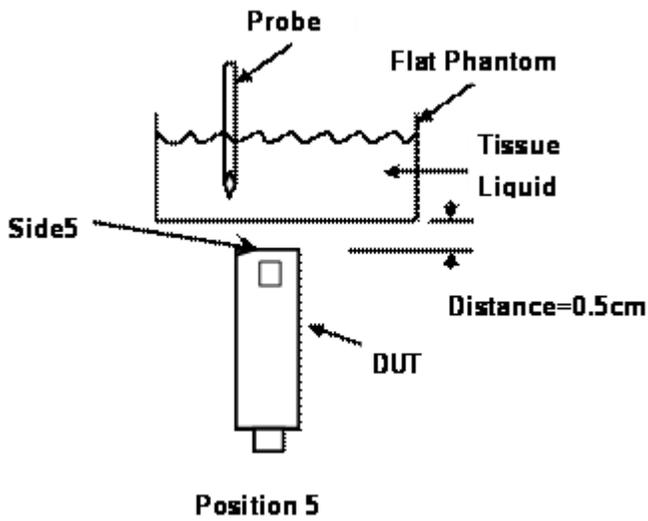

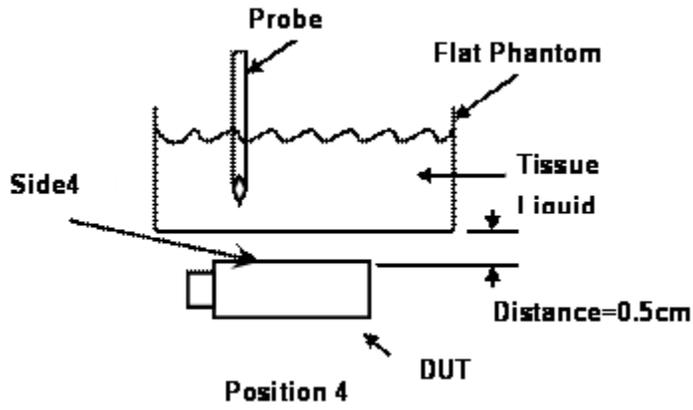

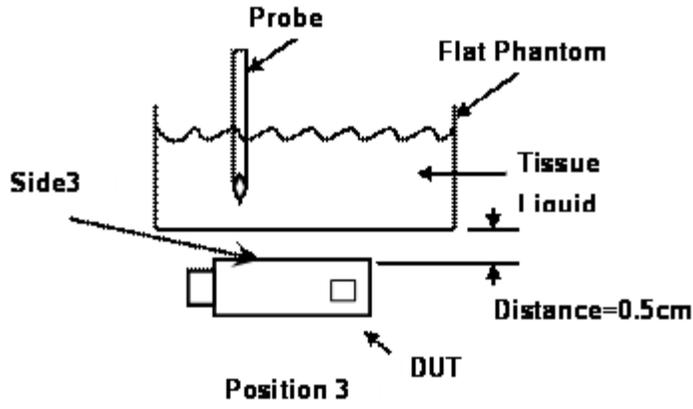

We are revised the maximum output power table according to KDB 941225, in which such as UE category, sub-test1-4, etc will be clearly identified.

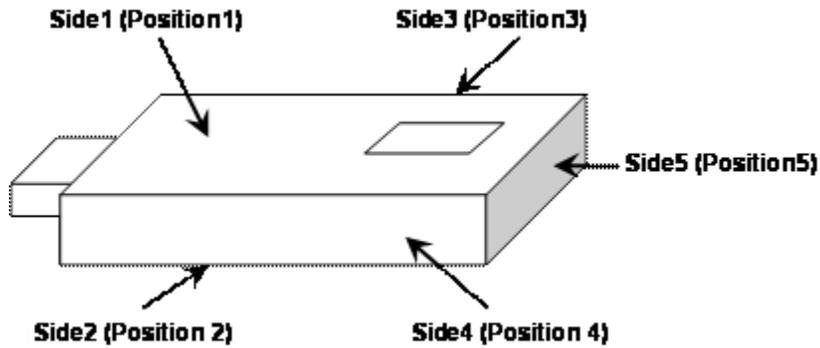

2) The setup of DUT is briefly described as follows: each of the five surfaces is tested toward the flat phantom with a 0.5cm distance.

Action:

To make it clearly understood we have revised the DUT setup descriptions as follows:

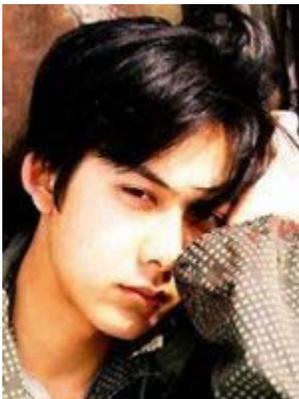

Each testing side is corresponding to a test position as defined above

Please kindly give us your comments about our actions and we will move forward accordingly.
